Transcriber's Comments

In this workshop we learn that after the UC meeting in Rome one of the directors of the Kf was detained in LA International airport for 48 hours, and Kf supporters have been arrested and imprisoned in China. MK warns the governments not to mess with the Kf or he will deliver even more knowledge! Further deepening into the technological advancements happening right now, we have the wireless energy unit – labeled as the new ‘oil well’ in the previous workshop. MK is now letting national manufacturers know that when this is released and developed in the next few months it will make the copper coils etc. obsolete so better to wait for the new blueprints of the static electric generator and the wireless generator. People from England who were at the conference have tested the Arizona infinity loop combination which got them 75% savings, and found this doesn't work with the 240volt systems in Europe – however their research has now revealed why this is the case and helped with development.

MK also reveals that the Jewish lobby had infiltrated the Kf at the highest level through Hungary, but all He has for the Jewish lobby is Love and prayer for their souls, as they are humanity also and part of us so the only way out of this mayhem is for everybody to pray for their souls so they might be drawn up out of their lies and their predatory behavior. The rest of the workshop MK deepens into the structure of the planet and how we humanity fit into the

grand scheme of things on a soul level, deepened at the end by a few questions from Azar, and some medical questions from Flint which result in some more info on rebuilding bone and cartilage...

Transcript

000540 Keshe (K): Good morning, good day to you as usual whenever and wherever you see these knowledge seeker programs. Please complete the Ghana application by the end of this week so we have time to get the security clearance. This is very important. The Ghana event is a scientific event and is part of this structure for the presentation of scientific papers. The second workshop is December 12, 13, and 14 2016 in Rome, where we have doctors to present papers the first and second days. If you are a medical doctor or a scientist who has used the medical applications, we open the doors for your scientific papers. Please submit the papers to us and you are invited to make presentations of your discovery in this conference.

K: We try to do these conferences 3 to 4 times a year to share information. What we do is we teach you in these knowledge seekers and for 500 students at the moment in the private teachings. In a way you become graduates and scientists in these fields and you are adding the knowledge. We want to see how the system works and doesn't work and we want to see alternatives using the technology the way you see it. We are not there to silence the critics but in conjunction with the critics to help people to see what we need to look at. This is to bring a balance that all people working around plasma technology are allowed to submit papers and share knowledge.

000842 K: Ghana is more or less governmental presentations and we expect the President, ministers and ambassadors from Africa to attend. We expect the same to be in Rome. We are inviting politicians and leading government officials to come to the conference in Italy so that decision makers can see the information for themselves presented by scientists from their own culture and nationality. We expect in the Rome meeting to follow the next one March 1-4 most likely in Italy. The presentation in Ghana is on agriculture, energy and space technology and medical applications. We will open the Keshe Manufacturing in Ghana and the government has signed the documents.

001020 K: the program is very simple. The Keshe Foundation (KF) has become part of the Ghana Atomic Commission. Our offices are set to be in the Ghana Atomic Commission in

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

collaboration and in conjunction with them. We have not gone in there with just talk. Benjamin has worked heavily showing the various aspects of the technology one by one in the past 8 months including decontamination, health applications, energy production and we have established our stand on the credibility of the technology. When we have the ministers and high officials in the meeting they have already seen the results. We are opening KF from the scientific standpoint to the commercialization for the all of Ghana. From there we move to other African nations.

K: there is a possibility that the whole structure will extend back to Kenya as the documents for Kenya Keshe Manufacturing are already signed and we expect Kenya to be the next developing government research center. Then we will go to Nigeria where Alekz is. We are strengthening the whole of Africa and expect to be in Sierra Leone in the next few months in collaboration with the Sierra Leone universities. We are establishing scientific bases all over Africa which means Africa is the scientific center for KF. We see it as a point where the development of the technology is needed and there will be much less aggressive opposition to KF.

001227 K: the opposition to KF as we are teaching more and as the information is spreading more and more centralized, and we see direct intervention and collaboration between governments trying to stop the spread of the knowledge because they see it as a threat to their industries. We are not a threat; we are part of the structure of people teaching.

001300 K: **we have an unfortunate event in the last seven days; one of the board members of KF was arrested for 2 days by the American government in the LA airport. This cannot happen.** Next time, if we see this we will release information to security operation so that it can damage the security operations of those who threaten us. You cannot arrest KF directors in airports when they are in transit the way you have been doing to me and this is the 3rd time this has happened. American government, you cannot intervene with the transfer of knowledge freely across borders. You cannot arrest directors and operators of the KF in airports, intimidating them and holding them in what we call solitary confinement to threaten them for 48 hours. We have seen the operation with me in Canada and now we see the same operation for the third time in LA. If this repeats we release security information that can damage security at airports for you to know that we know more than you do. We respect your integrity and you have to respect the integrity of the KF operation.

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

001416 K: do not interfere with work in scientific levels and not other levels. The companies who work in the background to create this mayhem for us we will respond heavily by releasing knowledge that makes your technology and what you have invested in to have zero effect. If we come across any more of what we have seen happen in LA airport in the past 7 days, interfering with transferring of messages within KF personnel and delaying it by 3 to 5 days and then releasing the messages after the person was released from what we call custody, done unnecessarily and just to intimidate, we will respond with knowledge release. That is the only way we do; we do not threaten. We release knowledge and that knowledge will literally do what you did not want it to do. Every time from now on we see any threat against us, we release more knowledge that makes more advanced technology of the present time obsolete. We don't attack; we just expand the knowledge.

001532 K: my direct call goes to those who made this threat and carried it out to hold one of the directors of the KF out of reach of the family for 48 hours while being held in the LA airport for no reason—just trying to intimidate. We can release technology for those who arranged the intimidation for their shared technologies to have zero value. This is how much you have to know as we work as the KF family, and how preciously we are standing for people. It is organized now; the flight was stopped to be known. The transmission of the flight was controlled by us and we know where everyone person is when they are moving about. It was delayed by 3 days that we were 'not aware of.' They were not aware that we communicate on other lines and we were monitoring and we knew exactly where our KF officers were.

001635 K: as the KF worldwide on which we operate our researchers and office holders must have free movement. This is part of the deal we have. We share freely and we have to be free to move. Any movement, any repetition of what we have seen and this is the 3rd time the American government has interfered directly with the KF directors or their families, I will respond with such a force of knowledge release that it will shock the whole structure. And I respond to this way with what you have done to us this week. KF has reached and will release solid state transfer of energy. The researchers and development team in four different locations have managed to transfer the energy very freely and we can replicate the system very simply.

001738 K: we are developing high transfer energy directly as a generator and what we said, wireless energy transfer very much as Tesla did but with plasma condition. The plasma transfer of energy can be extended and in the coming next two weeks we will show the whole operation as a blueprint. What we called the hybrid system has been surpassed by the new wireless energy transfer and it is extremely effective. In this process we do not

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

need to have any more wire connections or transmission. It needs to be done and we need one transmitter and a number of receivers. The last stages of development of this free, 'wireless' system will be shown. We can even show the process now; the people who work in 3 or 4 different locations around the world can show you the system.

001854 K: This is important for us because this technology exposes the shackles of energy and we can do with one transmission post feeding the whole city. This is not a dream anymore; this is the reality. We have managed to do a 2.5 Kw transfer across the small gap which is now transmitted to a sphere of the point and now the wireless energy transfer that we showed some 6 to 10 years ago, we are now allowing the KF scientists to develop it independently – this is important. We have now the replication of the wireless transmission and in wireless transmission we feed back the energy we captured back into the generator itself to become self-sufficient. Free energy is a word of the past. Explaining how you can create energy is finished. This is the plasma technology transfer and more or less, those of you who worked around Tesla systems understand this very fully where time and position are independent. There are 4 different locations that are developing this technology in different ways at this moment. We keep two in the public and two in the background as we were expecting what we saw in the LA airport last week.

002040 K: so what we will deliver surpasses the hybrid system. The new systems are more compact and the receiver and antenna will be delivered in a very simple way and this will respond back to those who were trying to push us to the point of 'no delivery' and trying to slow the process. You have actually sped up the release. We were not going to announce the achievement of what we call the solid state and the transmission, but as I told you, every time we are touched we respond with the love and care of more free information and technology. This is the only way we respond.

002130 K: what is interesting is what we have seen in the United States in the past week is the confirmation that the technology given to Tepco was 100% correct and our technology was used heavily and has been used by American organizations for the benefit of themselves by trying to cover up and silence our development. By responding to the company who made the move with the American government against KF last week is as follows: we would like to speak with you. We have more technologies that can benefit Tepco more. You sit in alliance and that is what we understood from the position of the interrogation and the involvement and you at on the line and you listened to it. Now we tell you one thing: we have more for you to carry on to Tepco and make more money out of it. We help you to become richer. Blocking us is not retaliation of

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

telling something. We would like to give you more information. We don't mention then name of the company but it has just been sold for \$364 million from out of nothing to using the KF technology and now we respond to this way: *we give you more so that you can make more advanced technologies*. You making a profit is our dream because you bring advancement to technology.

002302 K: you have to understand this is the process we look at every time we get pressured and we get hit, we offer you more that puts you and your conduct to shame. This company knows who it is and we have mentioned its name before. We have more information for you to become richer and make more profit with your shares in American markets. In trying to use our technology you tried to silence it in the background so that nobody could make anything with the technology. Now everybody knows who you are and what you done and we have more to offer to you so you can make more money.

002345 K: we have a number of announcements on the back of what we have seen. *Those of you who are in alternative medicine and you are registered with your government and can show the KF doctors' health section that you are in practice of alternative and have been for the last 5 to 10 years, you are allowed to join the KF doctors which brings the 700 doctors in China who have been waiting in the wings to join us. These are what we call the traditional Chinese medicine doctors that operate as the group of 700. We allow the secure, full translation of the workshops to you. The KF China will organize this for us. If you are an alternative medicine practitioner and you want to study with us, fill out the forms as the normal procedure. We have to check you through security that you are operating and you have long-standing operational system in respect to alternative medicine and you can now join the application of the technology for the health applications.*

002513 K: we have an announcement to make and this is important as we are an international organization and we have become an independent structure, governing ourselves. We have to share knowledge of what we have of a government of what we call One Nation to the rest of the population. The KF has shared this knowledge with securities and international securities where we gather information. There is a high alert and people keep this alert up in high population areas beginning now through Sunday night. This is the only warning we give you; as citizens of KF worldwide we have to protect our people; you are part of the KF family and we look after our family. Our security information at the highest level has seen and is reporting high threats as possible in major cities. The alert is high level and this is why we are sharing. I said this two weeks ago and I am repeating it for this morning (Thursday 9/22/16) until Sunday.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

002635 K: We have seen our alert stopping the process before because once they know we know and make it public, it stops them from carrying it out. The reason we don't see these events is that because by releasing the information we are not pre-empting but showing that we are part of the one family organization and we protect each other. We even protect those who are trying to help the others. Our intelligence is very clear: ***please keep out of major cities; keep out of churches until Sunday night. Western Europe and some American cities are at high risk. You are part of KF and you live in the cities and the intelligence has to be shared. The Jewish community in France has been informed and you will not see them in public until Sunday night. The whole of the Jewish population in France, Paris especially is off the street and they will not operate on holidays. The KF supporters deserve the same.***

K: Please if you live in Paris, Rome, Milan, Berlin, London, Manchester, major European cities, just be on your guard. The level of attack is very high. The international securities call it the full red alert which means attack is imminent and this means our followers have to stay alert. It is our job and we don't keep secrets but we share our knowledge and security information so that we protect to you. Harm to you or your family or friends is harm to KF. This is important to us. Please understand that we are not creating a scare. We have received high level security information and we share it with the family and we have shared it with all the securities in Europe and with Interpol.

002843 K: please stay away from major cities, the city centers and especially high level tourist areas, high level populations. Keep out: we hope that by releasing this they know that we know and we understand their process. And we can release documents to you that if the Jewish population in Paris has been told not to be in the public domain from this morning, this applies to the rest of the people as well. This is important. When we release security information at this level it means that we are concerned.

002927 K: there is another point that is affecting every single one of us at this point and at this moment. We discussed this before and I discuss it again because we see rapid growth in this technology of using mobile phones. We see a number of you using mobile phones now with head phones directly into your ears. Research shows and we have seen in our research the direct link between the head phones and the mobile phones you think you are holding away creates cancer in the brain and in the operation of the brain. My advice and our doctors' team in the background who can give you scientific papers and our own research is that head phones

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

connected directly to the ear can cause severe damage to the brain especially when we see when you become excited or agitated during a conversation or you get angry. You create a specific interaction with the fields of what we call the headphone earphone can create a point of high tension that leads to cancer.

003100 K: **please avoid using ear phones with your mobile phone. You are concentrating the field directly into the brain and this can be highly dangerous; five to ten years can lead to cancer of the brain.** We see a huge amount of cancer of men who carry their mobile phones in their pockets; we see the increase in testicular cancer and the muscle tissue cancer in the upper leg which is very abnormal. Muscle tissue cancer has been very rare and now we see a huge increase in those who carry their mobile phones in their back pockets. Mobile phones have to be away from you when you carry them. When you communicate, keep them away from your head. If you have it on an open channel (speaker) I know it creates mayhem but it is for your safety. We see a lot of young girls as discussed in the medical teaching yesterday, is that the rate of cancer growth is 100% for those girls who put those mobile phones in their bras and they put it near their breasts. Breast cancer rapidly increases and they say it is 100%.

003231 K: the boys, when they put the mobile phone between their legs when they are driving increase the testicle and prostate cancer. When you place mobile phones in different positions near your body you increase the possibility of cancer. Now the research is so heavy that the mobile companies are hiding all the information regarding this. Organizations like KF are responsible for releasing this information. We have seen a lot of people putting their headphones between their helmets and their ears because now they can ride freely. We see men who use these Bluetooth directly into their ears. You greatly increase the chance of cancer. What we recommend from our research is to avoid putting any kind of direction radiation like Wi-Fi, like modems, in the vicinity of your bedrooms; do not carry any mobile phones into the bedroom. A lot of people have a habit of doing this. But there are consequences of absorbing the directional fields.

003352 K: in the process once we produce plasma technology for communication that brings a balance. We have to study and develop that. Because now that we have the free plasma technology we see the balance within the body. Everything has to be checked and developed and strengthened. We don't go out and say 'we are safe.' We have to prove we are safe.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

003422 K: Now the plasma technology is not directional; it is balanced. The chances of any damage are very remote. In the present communication it is one directional and it is continuous until it is picked up. In the plasma technology information there is a balance point in the transfer. What we give we take back and there is no residue left to create damage and this is important. We ask those of you who work around the foundation with plasma, GANS and nano materials to test this and bring data not only to us but to the KF worldwide.

003512 K: **We have and shortly in the next few weeks we will announce the opening of the agricultural center of the KF in Italy where we will do research in conjunction with a group of farmers and we will use this as a place of teaching called the Oasis System and it will be run by Giovanni.** It will be somewhere near the east coast of Italy and in the coming time Giovanni will announce it directly. If you are in agriculture or in seed production or animal farming, we have access to physically and precisely assess all development. We announce the opening of the KF Oasis in Italy which in turn becomes KF Agriculture Center. We are looking for those who are well trained in this field to join us in full time research and development in agriculture. KF manufacturing in Italy has gone into the industrial production of farm equipment using plasma technology and different systems will be released with orders we receive.

003655 K: we have brought people on a full time basis at KF Italy for water clean-up and the rest. So whatever we receive requests for on the contracts regarding decontamination on the commercial side of KF systems will be developed by the innovation centers and the KF Manufacturing will produce them. Those of you who are connected to KF application of technology for manufacturing, energy production systems have become a small segment compared to other applications for the plasma technology including farming, industrial use, agriculture, health and more.

003739 K: we expect the beginning startups of these systems in the next few weeks and we will show the industrial systems in the coming weeks. Those of you who are in health and want to acquire these systems for your patients, KF manufacturing Austria has started production of systems and this will be on the website next week. If you want to test and develop Magrav systems, they will go on sale and you can buy the non-nano coated as a kit that you can assemble for yourselves and you can start teaching and developing your system.

003824 K: there is a discussion about the two different types of manufacturing. Each KF manufacturer works independently and we have seen the operation of the Magrav system

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

reducing energy usage by 70% in Arizona. They have repeated the technology for the second time using the third core of what we call the Magrav system and then seen the reduction of about 80% to 85%. We tested the same combination of the system with Italian manufacturing and we do not see it. The people who follow the KF in the UK tested it using the 60 hertz frequency and they do not see the same reduction. This is correct and we have found out in some systems and the work in Arizona is continuous. The KF in Italy does not have the same reduction and it takes a longer time. We have found out the difference in the process and we are repeating the process in Italy next Tuesday by the latest and we should see the same performance as Arizona.

003941 K: this is important as a part of the structure of the development of the technology for our wireless transmission. I have explained that to the innovation groups for the last few days and we are working on that target. As we have seen we thank the KF supporters' team in Rome who took the same principle back to England and repeated it and it is correct. We don't see the reduction the way Armen showed it in Rome; we don't see the reduction we tested in the Rome labs. We re-developed the technology again and now we understand the difference between the two systems, the American system and the Italian system. We release this to you because what has happened in Arizona, waiting to nano coat the system, we can directly use the system itself, which is nano coated, to start the process directly.

004050 K: in a way we bring it 'off the wall' into the system. This is important as we are an open structure technology developing company and organization. What we see we openly allow showing why it is not working. We saw those that immediately took the opportunity to 'show their hands' with 'this and that.' We have to tell you that we were infiltrated heavily by the Jewish Lobby and they came in from Hungary. They infiltrated at a very high level and it was part of the same organization that we saw that attacked the KF a few months ago and then 'disappeared.' They embedded a very high level Jewish hidden background in KF thinking we did not know. We already had intelligence reports.

004139 K: they became part of what called themselves as 'directors' of the KF and were extremely well hidden in the Jewish Lobby. We have seen them and removed him out of the KF very smoothly. We found him defrauding people in Hungary by 260,000 Euro. All the documents will be submitted to courts as the application submitted to the KF was by deception and fraud. We waited for mis-presentation and then we waited for them to submit lawyers' papers so we could actually get them with their own acts. The 'gentleman' has defrauded Knights of Malta by 260,000 Euros and was kicked out of the Knights of Malta. In fact, the cover was that he was Jewish, with Jewish background with illegal activities and we had all the

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

information. We had to wait until the application was submitted for our security levels to take action.

004242 K: we welcome the Jewish Lobby; you are part of us. But you have to understand that using people for trying to create mayhem in KF does not work. We are a strong family and we are very open. Our security operation works highly in the background. It does not matter if you call yourself “sir” which you don’t deserve because you never carried it. We talk to all the highly influential groups, the Masons, the Knights of Malta, the security services and we freely share knowledge and they share knowledge with us. Those who accuse us of all sorts of things by becoming part of KF not knowing that we know that they have defrauded their own Knights by 260,000 Euro and they are on the list for committing criminal activities and they thought they could discredit the KF. We did not show what we hand in our hands until they made their move.

004351 K: the Knights of Malta refuse any connection with the ones that called themselves *amberdetag* (?) and then they tried to kill them. They made accusations against one of the well-organized orders and they would respond accordingly with the KF in this regard. We keep our books straight but we do not explain how and why we do things and we don’t allow thieves to come in and try to create mayhem. We accept your words until we know otherwise. We have enough access to information and have found enough information that we will collaborate with the Knights of Malta to prove the infiltration of the Jewish Lobby under the name and the deception of the false application that allowed them to come in. We found out there were no threats and it was all made up to come in.

004450 K: please understand that we do these things to protect you. In protecting you we protect the foundation and the same with everything else. We have to explain the understanding of the technology. We have to add to the technology and do not allow others to do disservice to us, but we all have to be aware of it. In plasma technology you have to be able to understand the process of transfer of energy and understand the understanding and the process of how technologies are carried out and how it is received and how it perceives to be received and how you have to change the understanding between the field and the plasma. The beauty with the present condition in the world of technology and science is that we understand a lot of the work of the energy but we work on fields only, that’s the plasma. If you could transfer the knowledge of the fields into a plasma you will find out that your system can work much more efficiently.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

004618 K: let me explain the principle of when we call them fields and when we call them plasma. A field is one way and one directional, a transmitter that transmits information out. That is a field. When we speak about the plasma it means that once the field is received it is returned back with different information of fields to where they came from. The difference between plasma to us as scientific information and as field information of a plasma is very clear. When you transmit any information from the mass, from a transmitter, you release a field and you don't expect to get it back. If you get it back, we call it radar and we have a radar system so we see what comes back or reflects back. In plasma technology we don't wait for reflection. We wait and we measure the feedback and what is received and what is used and then what is returned to keep a balanced line of communication. This is a difference between plasma and a field.

004750 K: return feedback from the same field strength is one of the things to understand. If you understand this, it will make live much easier for you in research and development. You feed the plasma from your coil with the cancer tumor in between to another field coil transmission. Where this goes is from one to another and it gets passed on and this is the feedback. This is how much is used and this is the residue that I don't need. And in that process you empty the cancer cell from its energy. You give in magnetical, you receive in gravitational. This needs 3 systems; you can have multiple systems and this is the difference in the definitions between radiation/ transmission of fields and plasma.

004902 K: this is important and vital for you to understand and that is how we come to define the new understanding. It is feedback of the same using the gravitational or the magnetical. We take from the magnetical of one and we give to the gravitational of the other. Translate this from what we call a system like medical units that we see, to transmission of the wireless. You need to feed from the magnetical side of your transmission to be able to receive by the gravitational of the other system. We don't keep technology and information out of your sight or your knowledge. We give it to you to develop so you can pass the information on. I explain this very simply if you understand.

005006 K: the more knowledge we give you, the more you receive and the more space you open in the knowledge of the man to receive to share. (2 dimensional positioning graphic 50.18 minutes) this is your responsibility as KF followers. You don't follow a religion; you follow the ethos of correctness with yourself and your soul. Your religion is you; your temple of belief of correctness is your soul. You don't need to go to a mosque, temple or church. We bring the church into the house of the man and the soul of the man. We give you knowledge, share it like

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

a prophet with the others and then you receive more messages so that we can share more. It is not out of weakness that we share knowledge openly. We know the truth and the fact that by sharing openly it is received by the KF family more and we can receive and be enlightened by more. It is not the fear of sharing; it is the joy of knowing that we have more to give as we receive more, so that we can give more. It is a different school of thought. It is a different path of belief and it is work the way work is done in the universe.

005131 K: this is why the present structure of governments is totally confused and they see KF as a threat. Because they are used to 'protecting.' But they have not realized that by giving you receive more. This is why we have never become a religion, a church or a temple. Because We moved the religion, the temple, the church into the house of the man which is his soul. Look at the Prophets of God: they received messages and they shared. By sharing their number grew to millions. Now we are millions sharing knowledge with billions and when we share it is not that we are receiving information from the universal community; we become part of the universal community to share our knowledge with what we understand which can add to the totality of the knowledge.

005235 K: I have always said that when we take man to space we will not take man as subordinates. We take man as equal. Do not think that everything has to come from space or the universe or aliens. Part of the knowledge which man has developed is advantageous to the other creatures of the universe. So we are not going into space as subordinates; we have something to give too. And they appreciate it because it is not that they received and have all the knowledge in the universe. As the human race we are part of the jigsaw puzzle. Part of the structure is that we have to learn and the more we share, the more we receive to share. Keep your channels of teaching open and teach freely. Whatever is needed will be there to support. If it is not there it means there is something not right yet. Something has not gelled and not all the information is in the package.

005344 K: don't be afraid of opposition and don't be afraid of threats because the time spent to make and uphold threats is the time in which you have gained more knowledge and information to be more advanced. By the time they 'hit', they hit nowhere because you have already left the position. Share the way we share; share knowledge freely. By sharing it the way we see on the internet it brings you a lot of joy because it is giving. Giving brings you more information and brings you enlightenment. The human race is not behind with everything else in the universal community; they come here to learn from us because this planet has a lot of assets and

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

information, which has been missing from the universal community. One of them is loving; one is sharing.

005442 K: **The way humans love is very rare. They don't come here for technology; they come here to share how these people can connect in such a way because our structure is slightly different. They change their structure of existence to ours to feel what we feel as humans.** It is not that we are the takers; we need the aliens to teach us. We have a lot to teach to the aliens that we ourselves are becoming one in respect to the others. Understand the process: it is just different tools. Understand the difference between the fields and the plasma. As I said the teaching is complete; now it is for you to understand the process of application.

005540 K: In the present communication system you have a receiver and then you have to generate energy to send what you want back. In plasma technology what you receive you add to it in a different format and you send it back; this means you use the same and less energy is needed. Less equipment is needed; less knowledge of transfer is needed. So, for most of you who work in energy or medical technology if you understand this process it will be very easy to build what you need with wireless systems. But understand how you have to position your wireless system and how you have to work as one integrated system. Tesla was a prophet in the knowledge of science. He gave the message in the right way, but he only understood the fields and he could not extend the knowledge into plasma.

005649 K: as I have said in the past *the prophets of the future will understand both the ethics and the science and they will teach the use of science with ethics.* It is not like the past where you wash your hands and pray that you do not do wrong. It is not like Tesla where you connect this coil with that coil. We bring science and ethics together as one. This brings the application of the technologies that they bring in the future for your understanding in the ethos of using it. And it has to be your conduct too.

005728 K: When you develop the technology and you see a line, you share it and share the ethos of what you expect on it. Now your wish becomes your command. I like this knowledge that separates us. This knowledge that I have received and added part of my energy in order to use it for peaceful application and no others. It shall be done. Learn to interact. With your physical understanding of the systems, make the systems with the ethics of your soul, you will find out that you develop very rapidly. You will be enlightened and understand the processes because you have committed yourself in harming no one that means you will steal from no one.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

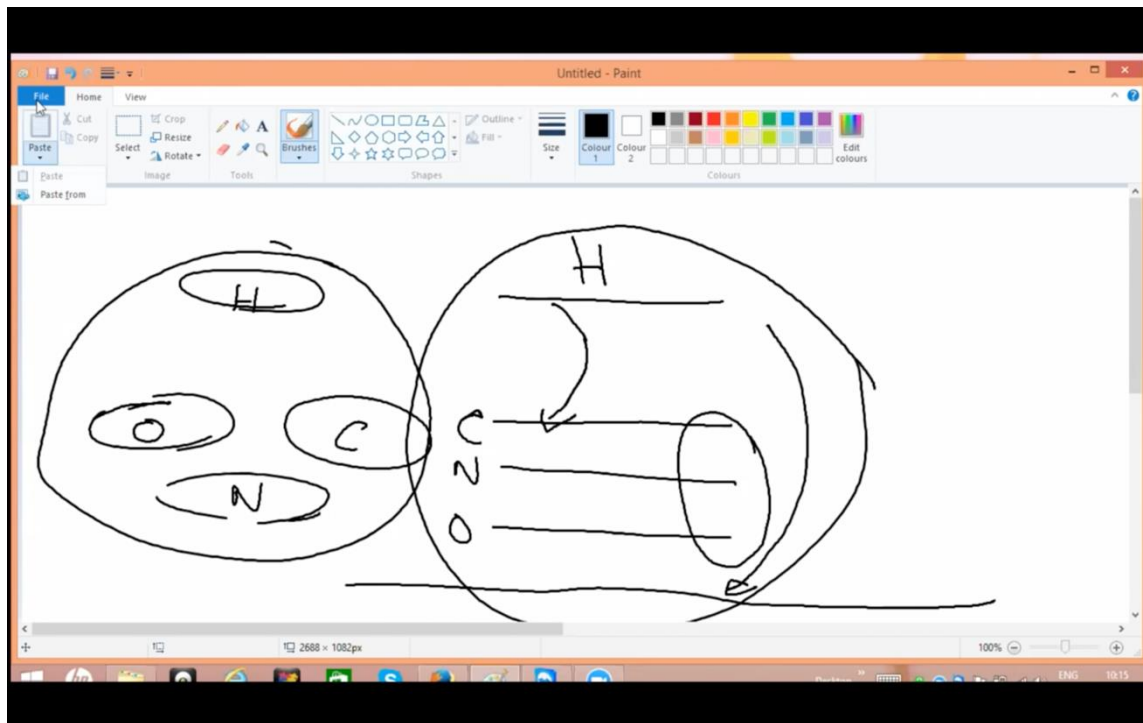

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

005821 K: Try to understand how fields interact. We go into the depth of the knowledge with the simplicity. Try to understand how the potential of one leads to the current flow of the other. This is what I see missing in most of your work. In one of the teachings a few weeks ago if you check I explained the balance and the potential difference. And this potential difference is applicable in every condition of plasma technology. Look at your plasma and your amino acid and look at the understanding of the work of the amino acid and understand it as a potential difference. Do not look at it as a chemical reaction and then the things will change.

005938 K: (opens teaching screen) if you look at your amino acid you have carbon, nitrogen, oxygen and hydrogen. If you look at this, you look at it as a chemical interaction. Now look at it as a plasma transfer and the ground is Hydrogen. The potential difference is the plasma of all the elements-the neutrons, protons, electron and the shell itself of carbon, nitrogen, and oxygen. Then the totality in respect to the minimum has potential somewhere here. Do not forget these are the order of magnitude and the potential difference of carbon to hydrogen is a lesser amount than the potential difference of nitrogen to hydrogen and that is lesser than the potential difference of oxygen to hydrogen.

010052 K: the work of the universe is not chemical; it's potential plasma levels of strength differences. You have to understand that the system is highly effective and that is how it works. If you didn't have hydrogen as a base level potential balance comparison, you would have never have been able to connect the other elements of carbon, nitrogen, or oxygen together in comparison. And near enough create life, repetition, enclosure in the system and what we call amino acid. You have to understand the same thing again if you extend the knowledge a step further. (pic 010156 minutes).

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

010206 K: you have the same process. You have the upper atmosphere, the earth, the center of the earth. In respect to the center of the earth there is very low potential and in respect to the sun, very low magnetical. But in respect to the center there is very high potential. Interaction of the two fields of the sun and the earth creates what we call the shell where the balances of all the elements occur. Why we have a thick layer of interaction of the fields between the earth and the plasma of the sun is because we are mono element in the atmosphere of a specific area but we are composite in the center. So, the composition from hydrogen to plutonium creates the different layers of interaction of fields upon the atmosphere. And this interaction allows a combination of elements to be attracted according to the friction of the planet.

010338 K: **If you understand more and you understand this process you will understand something very simple. Remember the old song, *It's raining? From the sky rains gold; from the sky rains plutonium; from the sky rains nitrogen; from the sky rains oxygen, because the field interaction of the matter elements within the structure of the center creates a composite field interaction and that composite field interaction creates a GANS of it, plasmatic field of it, and when it comes into interaction with the matter state of the earth will convert to the other.*** We see built up on layers upon layers on different parts of this planet. Where do these layers come from? Why do we only get sands on the deserts? Why do we get certain places only that there is gold? Why do we get nitrogen continuously? Now that we understand

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

more depth in the knowledge of the plasma we have to understand and open our eyes to the total truth and not what we have been made to believe.

010508 K: where do you think these stacks of dust appear layer by layer and in different colored layers and in different conditions in the atmosphere of this planet in interaction with what we call the shell plasma of the solar system? And, the shell plasma of the galaxy, and of our universe, with continuous frictions of different fields, rains upon man on this planet everything you can ever imagine. When they come in touch with the matter state of the earth, they become matter as we see them. This addition of the strength of the matter on this planet puts pressure on what we call the solid state part of what we call the continents. And this itself, an addition of continuous mass, puts pressure on the magma and puts pressure on the central core which changes the field strength and the compression of the fields on all of the planet.

010625K: Every year tons, megatons of matter, rains upon this planet. This itself creates pressure on the magma and it creates magnetical gravitational pressure on the central core. And that allows that fields increase and lose more into the atmosphere because now are 'squeezing the orange.' And that release reduces the gravitational magnetical field of the planet and pulls it more to the center, which is the sun. In that process we will see as the elements are created, part of them like oxygen, carbon, nitrogen and the others go through the same transformation as they grow as amino acid on the planet. And this leads itself to the creation of life above us. Every day we breathe; we breathe animals from the upper layers. But we never have been aware of it because we thought we were the last.

010740 K; I taught this in the teachings and now I explain it in the public teaching so you understand more. As we see life with us as humans on the planet, we have seen life as a fish, in the inner circles of the planet according to the level of the structure of the fields that arrived, and life exists above us. As I explained very simply, the fish at the bottom of the sea, the bottom feeders, absorb whatever falls from the top. In fact, we human beings have become the bottom eaters of the gas level. There are composite lives, but without the structure of physicality, that live above us. And when they die or they reduce in the strength that they become lower level, then we breathe them in and this has an ethic to it. *Thou shalt not kill*. Our breathing is the killing of the other creatures. Our life forces, the energy we absorb is by, in a way, digesting other lives. We are the bottom of the stack of the gaseous planet. So whatever is created here does command the same as the fish that dies on the top and is not consumed goes to the bottom and the bottom of the sea creatures eat what comes down. Otherwise the oceans would be a rotten pot. This is what man has to understand.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

010927 K: the truth about creation is not to think that man is the ‘ultimate.’ We are actually the bottom eaters of what is above us and creates life. If the amino acid could be created so that the interaction of the water and the salt leads with the matter state to the physical life of the man, so the gaseous part has its own structure and has its own life. We have to respect that and this is why I go on teaching *thou shalt not kill. Our breathing machine is the killer of the creatures up above and what falls that has less energy but still has existence of life.* It is very hard for those who don’t understand and easy for them to criticize. But this is the truth. Life exists in every level and our process of life is the same in the galaxy and the universe and the solar system.

011035 K: this is why we encourage the understanding of the absorption of the fields because it says *thou shalt not kill.* Our breathing is a process of killing just the same as when we kill other animals to eat physically for our physical side. When a man learns in totality how to absorb energy, what is available, man will find peace within himself. What we did not want to know, what we always denied knowing and what was taught oppositely was *thou shalt not kill.* Our breathing system, feeding system, being a vegetarian, being a meat eater, or whatever you call it, is the process of ending another life and taking the energy as a store for our survival.

011135 K: NASA and other space agencies have shown this life. I have repeated this many times and now that we understand the process of the plasma it is for us to understand the next step in the space technology. We started the teaching of what we call the Mozhan in the coming weeks and we announce in the coming weeks the position of the training. There are a number of people who have applied to become Mozhan; some of you have already paid. Please complete the full process within the next 10 days and you will be told where and when to attend by what we said in the autumn. The beginning of autumn is today. We have people from Jewish background who have applied to become Mozhan. We welcome you. Take a peace to your spoken language. We have people from other paths of belief and life who have joined the KF in the Mozhan training. We welcome you, but teach the ethos of space to your culture, to your language and to your people.

011254 K: there is a big problem in the space technology and teaching. Until we bring peace to the tribe of Moses they will not leave us in peace. And this is what we have to do. We shower them with love and care and we will change the path of their work. Understand that we cannot destroy and we cannot kill. We can only share what we have and we want to give so that those who have given to us. I was teaching very recently and I said theology and science at this level

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

cannot walk apart; they go hand in hand. It is in the writings of Christ; it was supposed to be in the tablets that were given to Moses. *Thou shalt not kill*. How come the Jews and the Christians are the manufacturers, planners, designers, executors, of all the killing machines and planning of wars? Is this the ethos of what you believe in and what you given to you? That is why both are condemned. It is in the writing of Christ, bless his name, *thou shalt not kill*.

011439 K: we kill by breathing; we kill by machines designed to kill and then we say *we are Christians*. Shame on man and the leaders who abuse the name of Christ. Europe is not as the French President said, *a Christian Club*. Christ shared his bread and brought peace. And we see the exact opposite with the Vatican. This is the change of point for Vatican too, and Christianity. Work by the ethos of Christ and by the rules of his conduct by sharing the knowledge as you would the bread, by sharing the blood, which is his soul. You will find out that humanity will change. Everything written in the Holy Books is done exactly opposite by the man who says *we have Christ*. You are taking more than what you are giving by stealing.

011600 K: *Thou shalt not kill*—the most advanced technologies for killing are manufactured by the Christians. All the planning of the killing, the mass murders and the wars has been planned by the Jews. This is opposite to the writing on the Tablet of Moses. Then you still expect to see peace? Impossible. Now we bring that balance to force it to be done, that man is forced to go back to the teaching of the Christ.

011642 K: you have to understand that balance comes out of peace—peace in mind, peace in the balance of emotion. Balance comes in knowledge, science, technology and understanding the application of it. Understand that what you take if it is correct will come out as knowledge to the others. What you steal you have to pay back with the losses in your own damage. If you are a Christian and you develop my technology you have to live by the law of the KF and the law of Christ. You have to make sure that the knowledge that you receive and develop has to be on the basis of his work because you have committed your soul on the path, the road to the creator through Moses and Jesus and their souls, not their physical lives. Your condition is *thou shalt not kill*.

011800 K: you give the knowledge the way Jesus shared his body and his blood which is his physicality and his soul. Go back to the teaching of the foundation: *this is my blood, this is my body*. The blood is the path to the emotion and all the medical teachings we teach and that is the

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

path to the soul of the man. Physicality is the body, which we share the knowledge and the physical to change and that is where it stands.

011848 K: you have to be aware of what is and how you apply the technology and how you make it your wish and how you understand your wish is your command and this is what I want and this is what will happen. Understand what you have committed yourself to in the application of the technology and what you want the technology to give to you in its application and then you find the balance. The machinery and the reactors are all what I call a show because you need to see the physicality and the tangibility of it to confirm its existence. Otherwise you don't believe in it or yourself. It is beautiful when we see people sharing knowledge so openly in the latest ways on the internet. We have the tools to share.

011953 K: We see those who wait for the smallest something to show their existence of their maker of thieving. It comes from their blood and it comes from their upbringing. They always have to show the negative to show that they are the takers. They show their own additions—*what if we add something else to it?* You have seen my reaction today in respect to the imprisonment of one of the KF directors with all the threats. Our revenge is very simple: giving more that it puts them to shame. We don't take revenge; we have the pleasure of giving more that it puts you to shame; you share so much and more knowledge. The knowledge that you have becomes irrelevant. You follow the KF, follow our path, live our way, and bring the temple of God into your soul. Then you become the messenger of the man.

012109 K: I emphasize this again and again because we are reaching the point that we have to come to understand that there is a time to join the soul and the physicality of the man together. Then the man can open his self to the universal community. You are looking for a spaceship to take you and the spaceship is you. If your soul was the decision maker of the shape of your fingers and your eyes which is the container of your existence? If you understand it, it can become the container of your spaceship and the universe becomes the oyster for the man who understands this.

012205 K: Translate the knowledge we share as a family as the next step to progress to a more peaceful life. We have become so tied up with finance and what we call the physicality of exchange that we have forgotten that we have everything we need for exchange. We take what we need. From now on you cannot separate and I will say this over and over again to those who don't understand it until those understand it, the development of technology in space in plasma

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

cannot be separated from the ethos of the conduct, because from now on your conduct becomes the position of your spaceship, the position of your soul and the position of your physicality.

012312 K: I explained to the universal council members in the past few days, we do not put a badge on the body of the members of the council in the Rome meeting so that they could stand out. They have to stand out through the conduct of their souls, that the people see it without the badge. So among us at the meeting no one knew who was a member and who was not. We are all the same and we are all a part. Understand the transfer of the plasma applies to every level of the existence and use. You learn and you teach us; we learn and we teach you. We add to the knowledge and we give you and you add to the knowledge and give to all of us. Then we go to the next step. The same goes for the governments, with individuals and with different organizations.

012419 K: as I said in the KF we have every path—we have Jews, Christians, Muslims, Buddhists, every other path and we welcome everyone because the path is for one thing, the betterment of man in the true order of the prophet as a soul and not in the physical life. If you are American, Chinese, Iranian, Arab, whatever, it makes no difference. You have a soul and your soul is connected with the rest of our souls. Lack of level of your soul affects us and we have to give more. It is better to be a giver than a taker. Understand the principle of teaching and then you become the teachers because as I said this planet is beautiful. It is the behavior of the man that has brought the color of red to it. Understand that to develop technologies that do not steal what is not needed but it gives so that what it needs, it receives. It's a different approach.

012555 K: this way no one can misrepresent another and no one can become the leader of another. We see different interactions, operations, demands, requests –can you help us with this or that? Or, *you are a charlatan; you didn't give us this or that.* We gave you and you did not see; we put things on the table and because you are so greedy you do not receive. I teach you something which is important for you to understand. You remember the cup with the orange and where you put the amino acid, the CO₂, the copper oxide and on the other side you put the Zinc oxide? And then what you did was you brought the taste of the orange into the water. You drank the water, you tasted it, you did the banana, some of you did fish and chips and some of you did hamburgers.

012727 K: now you will be shocked. The cup is you as a human being; you have the amino acid, you have the zinc oxide in your body, the copper which is your muscles and you have others.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

The orange on the top is the soul of the man. And in your body you carry 70 to 80% salt water. How clearly and how much more do I have to clear the state of the man? You can receive whatever you need from the space above without killing. You carry the essence of the creator without killing the creator within you. There is no difference between this chap and this container. If you could smell and taste the orange in the salt water of the cup, would you have ever tasted the salt of it? But you were the organizer of creating the GANS of it with it, which is in your body. Now you understand that you can absorb anything from anywhere—from the environment above you if the wish is from the soul of the man, which is the orange itself.

012923 K: if you can understand this then you understand how you change your physicality in space according to where you are. You are an apple; you have the physicality of apple in the same direction in different realms of creation. You want to be a banana then you will look like a banana because you have interacted with universal energy. So what you are looking for a cup in order to taste the orange, you are the cup. You decide what you want to taste. If you understood the past two minutes of teaching you have understood the secrets of creation and existence. Otherwise it is just a riddle and shame to the speaker.

013031 K: You have to something in your hand to confirm you have something. You have no trust in what you have in yourself because it has been so easy to steal. And this stealing has become the cause of those who can use it to harm others by creating wars, selling tools to kill, equipment and machinery to destroy more lives. Ask yourself a single question: *is what is about to happen in Europe and America deserved by the people of these continents with the tools of war which they have created in recent time for creating more mayhem and killing? Thou shall not steal; thou shalt not kill.*

013142 K: don't forget the words of the Christ: *an eye for an eye, a tooth for a tooth.* How many lives have been taken by the operation of the tools built and developed in the rest of the world and the rest of the countries? Now the eye must be paid for the eye. And the tooth has to be paid for the tooth. Don't forget, it becomes the inheritance of the children from the father. It is a lot to digest, but the digestion time has started. Up to now you have eaten and now you have to digest.

013235 K: the consequence of drinking poison is to stand the touch of the poison. Change the way and try to get people not to fight for peace but deliver so much technology that they don't have time to think about war or a piece of the planet to possess. A lot of you have been in this

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

and you have not seen it. Those of you who are touched by the knowledge live in the kitchens. You have moved out of the bedrooms, live in the garages and you still don't understand why. Because you have become the true man of space. You know that what you need will come when it needs to be done and you have time to give. Stop coming to the foundation to take as a habit; come to the foundation to give the knowledge and to learn the knowledge so you can give more. And this will be your pitfall and downfall.

013354 K: as I said very recently: organizations like Microsoft, IBM and the rest release people who came to work for them by thousands daily every year. Tens of thousands of people are 'sacked,' walk out, move out or go to another job with other major corporations or other major companies. But when we kick out the crook and the thief everything becomes wrong about us. You bring millions but we spit out the thieves and then they become everything wrong with us--one man for a few weeks. But they don't understand with this process that they have lost their souls. They start living in the doldrums.

013444 K: See how many have done that. And they think they have achieved something about what is wrong with the KF. Actually they show us what is correct about the foundation because we pray for their souls. One out of thousands joining every day and out of millions joining every year, understanding when we spit out the 'dirt' the 'dirt' becomes the victim. Otherwise it doesn't show how dirty it has been. We allow you to come in and become part of the KF because your soul accepts your coming. But we see the soul of those with misconduct too. We don't need to take a wrench or fight. We spend more time developing.

013537 K: the process is that we warn, inform, and teach all aspects of technology. I have a field that is very strong. Your field is very weak; be careful because you cannot absorb it and it will damage you. You can move and position yourself so that it doesn't. You see this with the new Magrav technology plasma fields wireless system. We create a huge amount of energy, but we interact with the energy. You take what you need from us. 1.36.13 minutes. We take what we need from you is not the way anymore. That is why there is no money transfer. There are no financial transactions. It is the freedom of giving what I need and the freedom of taking what I need.

013635 K: I was talking to an industrialist about this recently. He asked *how are we going to get our shirts? How will we have chairs, beds, clothing if we go this way?* I said it is very simple: *I work for 2 weeks a year and I build all the chairs I can build in 15 days because I am forced to*

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

and then I spend the other 50 weeks enjoying, learning and sharing knowledge. I don't want to get paid for what I do because in those 50 weeks during which I am not working I take from the others who work their two weeks. It is very hard to change what has been ingrained and forced into us that we have to work 50 weeks a year to have 2 weeks off and to have a rest for the physicality. In the real life we work 8 hours and take a 16-hour rest. How come the cycle of life has to be the opposite?

013740 K: what if I take 1/3 of 52 working and the 2/3rds is to give my physical body a rest where I can participate to give more. I don't need payment. I work freely and I have been given freely. I won't stash a houseful of clothing. I take the clothing I need for that time. There is a very big understanding and it is going to hit the financial and governments very soon with the KF. We came through the back door, but now we have the key to the front door. And the front door is open; nobody will ever lock it. Let me show you how we came through the back door.

013838 K: we have taught you about the orange and the water if you understood it fully. We have taught you how to feed yourself from the universal energy. We have taught you the application of the medicine that you do not need to be trapped. We have shown you the power production with the Magravs and the rest. We have shown the power of the space technology with the Iranian capture of the American plane 8 years ago, more or less exactly. We have shown you how to produce materials through the knowledge seekers of Austria. You have food, medicine, energy; you know how to travel and to make material. Do you need to be a slave to the man?

013949 K: we have changed the world economy without any economies or government having any say in it. It is now time to teach; teach in masses and don't be afraid. They hack your computer because the guy wants a 2-week holiday when you are getting 50 weeks' holidays. He is jealous. He has to discredit you because you share knowledge and you have 50 weeks and he has to work 8 hours a day for the paymasters. He is a slave to humanities physical bond, not you. How many of you have come to the foundation and worked around the foundation and you have now gone out and are setting up different ways and a better life style than before you came. You produce lectures, you give Magrav teachings and you are producing coils and getting an income from it. You are sharing in the food and things that come through the summer.

014055 K: we have become a new industry; we have become a new culture where we will change culture. Do you need to go to the copper shop to buy copper or can you follow what

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

Peter showed you in Austria to produce the copper you need from the fresh air? Where do you think the copper comes from? Partially the way you captured CO₂ from the air, the carbon was in the air. You just captured it and now the copper and zinc you see on the plate is already partially in the air. Between the coils you create the environment from it to land on your plate. The more you want the more the earth will deliver to you from the space of the universe. You want to be filled with the food that the hunger would not touch you? Put yourself between the two cores and you receive what you need every day for 2 seconds. Just walk through it and you are fed—no hunger.

014204 K: do we teach more and explain more or would you see the light yourselves to expand more knowledge? If the container or the plate can show the delivery of the nickel, brass, copper or whatever and it is scientifically tested, and we are going to do more of it to show it, when it becomes the matter state it shows itself. But if you need copper and you walk in that field your body takes from that field what it needs. You don't need to eat; you don't need to do whatever. When you need something we are becoming more experts at producing more fields for the specific material.

014258 K: there is no way that the work of the KF can be stopped because there are millions of you doing this. Don't fight the government. Deliver new understanding and technologies that show what they have now has become obsolete. Fighting takes energy. I don't fight; I open and explore and I show the hand of the others. They have time to fight each other. We have time to expand the knowledge. Work on the understanding of the plasma. the deeper and closer we get to the time of what we call the time left and opening, the more I tried to teach the ethos of the working of the universe. **We are not prophets; we are here to be profited by the peace of the universe for man and knowledge is part of that process. Understanding the use of the knowledge is more important than actually having the tool.**

014413 K: there is no use if I give you the latest model car when you don't know how to drive. It's as good as the donkey. At least with the donkey you could walk yourself. The car needs the knowledge of driving. Where is the ignition, where is the gear box, what do you have to do to get what you want from it? As I said I have given you the most beautiful Rolls Royce all made of gold and the only thing that is left is the ignition key. The ignition key is understanding the ethos of the universe. You will drive the car without even getting into it. The key is understanding the balance between the soul and the physicality and understanding that you are not inferior to others and you are equal. But you have to give more so that you are empty so you can receive more.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

014519 K: you don't receive out of pity, you receive out of generosity and that is a big difference. With the KF technology and ethos you are made into a man of generosity. You don't think what comes; you have enough to give more. If you understand this, you have opened the key to the golden car. If you don't understand this, you are full of criticism and there is something wrong because it is the lack of your own soul that is not elevated to understanding the condition of the universe. You build the system and it doesn't work; don't blame the system. Try to understand what was not understood by you in the operation of the plasma. Understand about your own lack of knowledge and your own transition and confirmation of understanding and then it becomes easy.

014628 K: the biggest problem you will face in the development of the plasma technology is the teaching of part of the knowledge of the present time in the matter state. 1.46.40 You have to separate what works in the matter and what works in plasma. They are different worlds even though they have one common denominator, which is smaller weaker plasma and stronger plasma. Try to understand why your system doesn't work—what is the missing link that is not done? I enjoyed watching the guys in London replicating the unit they saw in Rome with Armen. We thought the condition was 60 hertz, but the Italian system does not work on the same system as we see in Arizona. We could not see how the system developed by Douglas suddenly doesn't come to work when it got to Washington. Why did it burn out and why did it blow itself up? Because all the systems are set on the balance.

104754 K: what I saw in London was beautiful. What we saw with the MI6 people in London is fantastic and it was confirmation of what we saw on the floor in Rome. With their sharing they enlightened us with why the system in Arizona works, why the system in Europe works a different way. It reduces power usage but it needs a Magrav conditioning and Arizona doesn't. We tested that and by next Thursday we will explain to you what we all learned. We shared the knowledge and we shipped all the materials from Italy to Arizona KF factory. They did the unit slightly differently and theirs performed better. There is no misunderstanding in what Arizona has done; they added their knowledge to it. The beauty of the way John in Arizona works is the opening and sharing of the knowledge so rapidly. This is how it should be. He is an equal partner with us in the factory and he shares equally with us as we do with him.

014915 K: now this sharing and this confirmation by the guys in London opened up a new angle for us to see and now we see how all the systems can be brought into 100% reduction in power

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

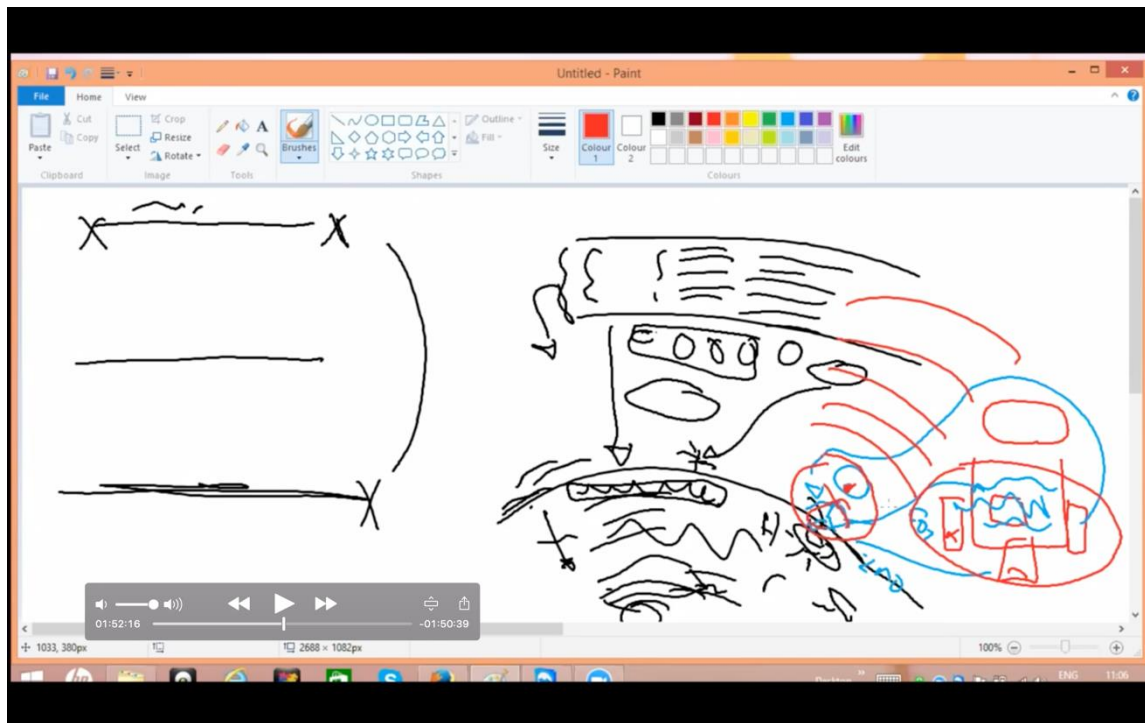

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

usage in the next several weeks. This is important because reducing the demand from the supply allows us the transmission from the free fields on what we call the wireless system. We take very little from the plasma of the transmitter and then we can amplify it to what we need. It is beautiful what we saw with the openness. And the first comment we saw from people who thought they were very clever, and we expected this, shows that they are still serving their masters. But, the beauty was the openness we saw in London from the guys who came to Rome. They understood what their job was and hopefully they will become part of KF Manufacturing UK in a short time and we support that. They solved a problem we had in a few short weeks and in that process we learned from them.

015028 K: the video was put on as the confirmation of sharing what we saw that was wrong. And that knowledge allowed us to look at a different way and in that process we created a more efficient system for most of you. We don't look at negativity; we look at what is brought in positively. The ones who look at negativity have to confirm their meager existence. They have been paid by the Jewish Lobby in Tel Aviv. Otherwise they don't get their paymasters paid.

015107 K: But the guy who comes, a guy that I call as working for ex-defense ministry in the UK and others and they go and replicate it. We told them what our concern was and they immediately confirmed it was not what we thought. So it allowed us to see the knowledge was shared so freely. We do the same thing with people in America, Japan and everybody else. Share the knowledge and show what can be changed or what thing not to change. We will release more technologies when you are ready to receive more. There is so much knowledge that is coming out that you do not know what to do and there is a lot of mayhem and confusion. People are not taking the corners of the carpet to pick up and carry the carpet. They see the big roll of carpet and say they are not carrying it, figuratively speaking. The carpet will not be carried if each one of us does not hold one corner and one part of it.

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

015216 K: If you understood what is on the screen then most of you understand creation in the universe, how to feed yourself, how to convert yourself into the energy and how to manifest yourself according to the environment you are in, how to create matters and how to interact with fields to show what you are and what you can become. You have a Magrav system and you looked at it as something that would give you something free. You never looked at it that it is a collector, a transmitter. If it is a collector, I would like to give to it; if it is a transmitter I would like to receive from it. You were happy with 2 wires coming out of it and I was giving you the energy of the universe.

015315 K: soon you will understand what I mean. Very soon you will understand. I showed this this morning before the teaching to the guys from the innovation center. As I said to them, I can show all the systems and then become as a magician. You show all the systems that a lot of people know how to do it because they know they cannot stop the process. We saw this in LA in the last 7 days. They held a guy, but they knew the knowledge is already transferred. There is no use touching the guy anymore and there is no use threatening to kill him the way they did with me. I received information that the man who made the threat and his boss at the moment cannot stand and she will not be there as she will be mentally disabled by threatening to mentally disable me.

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

015422 K: the reason we teach this way is to make sure enough people receive the information so there is no way the knowledge, the understanding and the ethos can be blocked. The Presidents of the United States and China are too late to show their power to us. We have surpassed you a long time ago and you are still busy in your childish work. Putting the supporters of the KF who understand the technology in prison in China will not help because there are more people who will understand more. Threatening to kill the KF people in China by the Chinese military will not work. We received the threats and we responded to the threats. You do not threaten to kill or imprison KF supporters. We release these and we have taken screen shots of this (information) and it cannot be denied. It is stored in safe places. The information saved shows how KF supporters received threats from the Chinese military and the Chinese leadership.

015539 K: we don't stand pressure from one country. It goes right across and we are changing everything. Mr. Zhu threatened to do a lot of things to Keshe supporters and then he came to become a supporter. But he was undercover for another ethos. And we shared that directly with all the KF supporters. We received the life threat from Professor Zhu and his supporters in the military. We didn't respond; we gave them more information and more support. This is how you have to work. Return the aggression with love and with knowledge. This is how it should be. They come with a very low level field and you give them the higher. This is how you should operate and how the KF supporters should operate. Because don't forget the word of Christ, bless his name. *God forgive them as they do not know what they are doing.*

015700 K: you don't take the sword out and do what Moses did by slaughtering those to show he was more powerful in his physicality. The more you learn, the more you teach and this is my belief and what we have done. The more we teach, the more we enlighten and the more people will walk from the pain and shackles of painful lives. Try to understand and when you teach in your workshops, teach the understanding and don't teach the mechanical system. They will make the mechanical system their way. This is important for all of us. This is important for us to understand how things work and how things stand.

015824 K: You have to realize that the process of sharing has to be to teach fishing and not give a fish. They will decide what kind of fish they want to catch because now they know how to fish and because they know different tricks than you do. They have different life experience than you do. Understand always whatever you do in every aspect of the teaching and learning the technology from now on and from the past, if you are the weaker plasma or if you are the stronger plasma. Understand if you are creating a weaker receiver on the gravitational or a

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

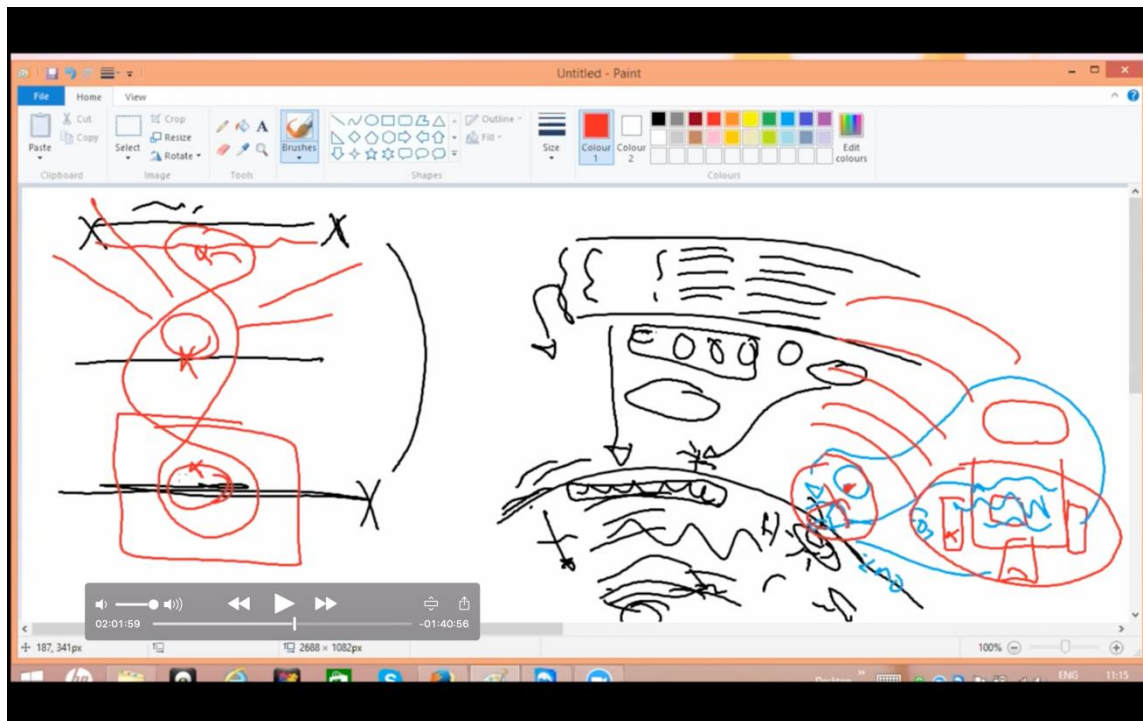

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

stronger giver on the magnetical. If you are creating much stronger magnetical you cannot receive by the gravitational unless you reduce it enough that the gravitational can accept. The gravitational cannot take more than what it needs. This is the secret of working in this field of the universe.

015950 K: you can put a bowl of soup out, but if I don't like tomato soup and you gave me a big bowl of tomato soup it's not my fault that I don't want it, because I don't need it even though you gave me a bowl of soup (tomato). If you give me a fruit salad, 2 spoonfuls, that is all I need. You can share the tomato soup with somebody else who needs it. It doesn't mean there is anything wrong with it; it means that I don't have the capability to accept it and I don't need to accept its strength. Understand that when a system doesn't work and you set it on the magnetic gravitational GANS system even the matter state or the mixture of them, there may be a balance does not fit in. There may be something as part of the knowledge that is missing.

020045 K: If you made the human, why isn't the body accepting all the energy it needs from the universe to eat? Is the gravitational field of the earth the cause of the existence of man in this form? You have to understand that the energy sits on the top and you are here and the earth's magnetic gravitational field is there. You are part of the condition of the fields and earth needs you and to have your physicality to be able to operate in different ways. You are the antennas and part of the process; you become antennas by your existence. Find out how you can take more from the fields that you need less from the physicality of this. Then you can go without killing and destroying other lives. **Pic 020159...**

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

020202 K: understand the equation that your soul is part of the structure of killing. I explained this in the past couple of weeks because I realized there is a misunderstanding in the whole process. And, I explained it, and I explained it again and again because it is important for you to understand. It is very simple. (Starts drawing 2.02.38 minutes). There is an egg and there is a sperm and the interaction of the two has led to the creation of enough energy that it led to the creation of what we call the mass. This mass in the center, the same as you have seen the hollow center in your cores, has led to the creation of transfer of energies between it that has led to concentration of the field in the center. Then this center decides the shape of how this plasma will look (stick figure of a man).

020325 K: But the additional information we didn't have is that now this center itself, now that it is a plasma, has to find its balance with the other centers where the position of these centers dictates the shape and the color of the manifestation of this physicality. The egg and the sperm—the line of communication, the emotion of the man – the center is the soul of the man which dictates the shape of the man in the physical life. In fact, if you look at it now, the interaction of the souls dictates the outcome of the shape of the man and the physical behavior of the man. This is one thing you never understood and now you have to understand it. This is how life exists in the universe.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

020447 K: It is your soul which dictates the color of your eye and the physicality is the common denominator in shape, but the color of it and the strength of it is dictated how your soul has been pre-set by the other souls to be so they found their position and their confinement in the universe. Be it the man of earth, or be it another species in the universe. You thought you were alone but in fact your soul is the dictator of your physicality and its manifestation of its conduct. And its conduct relates and conditions your soul in the position of the others. You call it the Day of Judgment. It is not your physicality that dictates the position of your soul. It is your soul that dictates the position and condition of your physicality. And, the emotion is the “Chinese Whisper” between the two.

020557 K: if you understood this, then you understand the next level of understanding the totality. You brought the matter, you made a GANS of it, you made it dynamic, you made the hollow center of it and that became the center of the fields. That hollow center is in the brain of the man and it is called the soul of the man. And then each soul has to have its own interaction of what we call magnetic gravitational positioning in respect to the other souls and what it gives to others it has to take. When they see the misconduct or change in the physicality of others, they have to position themselves that the physicality changes.

020656 K: you say, *I was unlucky; this (something) happened to me.* And you say, *I was lucky this happened to me.* It had nothing to do with luck because the souls have already positioned you to receive what you did that was good or what did that was bad. Or what you did was bad, but it has made a favor and you gave freely to the others without knowing, but the souls do not see that. They position themselves in what they receive from your bad conduct which turned out to be the tale of the unexpected for you but it was reality of the conduct of the physicality.

020736 K: it will take you thousands of years to unravel the teachings of today but those who do will achieve peace very rapidly. And, this is our target. I don't teach *how can I reach the man in the Amazon who does not even have candlelight yet and this is after millions of years of the human race on this planet.* But I teach and I reach the soul of that man without a single wire through the candle of the knowledge and the release of the soul of the man. Now you understand the difference. We haven't come to 'conquer.' We have come to let there be no conquerors and all are equal. We conquer only one thing, the love of man. And through that we control his emotion, his knowledge and his freedom. 2.08.35

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

020849 Azar: (A) Good morning Mr. Keshe. When we share knowledge from my experience in sharing knowledge in the past in terms of humanity and bringing awareness to people about who we are, so what happens sometimes when I share knowledge, after that you feel a good sensation. Sometimes when you share knowledge with other people I get this vibration feedback in my body as though someone told me I should not have shared that knowledge with this person. I get 'twisted' in my core and I don't understand that.

021010 K: it means they are not ready to receive it. It's the bowl of tomato soup. You give but it is not for them; they refuse it. The first time when I knew my mission and I explain this to others, I can give and it is only you who can refuse because you are not ready to receive. But in the time when it comes, when you are ready, the soup is on the table ready for you to eat. You cannot steal from a soul; you cannot steal from the knowledge by not giving. Your job is to give and it depends on them if they are ready to receive. We see this in real life a lot of times.

021146 K: A lot of relationships can't have what we call a child; then you find out somewhere down the line after they adopt 3 or 4 children, they have their own child. In reality their soul was not ready and there was not confirmation, even when you say *I love you and I want your child*, but in the soul you are not sure if he is going to be a good dad. After you have children adopted, surrogated, and now I see you are so gorgeous with the other children, then you say *can trust you now*. It wasn't there; it was the soul that could not accept the sharing of giving another life. There was nothing wrong with the sperm and the egg. A lot of people don't understand this.

021240 K: we see a lot of couples cannot have children these days and it's a huge problem. We blame it on water being contaminated, on radiation, on whatever you call it, but we don't look at something else. We see a lot of this in the Western world, *is the guy making love to the woman to make a child with the woman she is with or with the woman he was with before because of the openness of the misconduct of the past*. This hasn't been understood because it is easy to blame the physicality. In the West we were explaining on one of our private teachings about having what I call 'partners' is like changing trousers. And then you find out when you want to fit trousers into this, it doesn't fit because there were too many trousers tried before.

021350 K: this is the problem. When you feel they are not receiving, it is not because you are doing something wrong; it is because they are not ready for it. To them you have to introduce different kinds of materials as you would in cooking at the right time. Otherwise it does not work. You cannot put a potato before you fry the onions and the meat. You have to put it in

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

sequence. It is the same with the man. The potato is on the table and with the right timing of cooking the potato you get the right taste. This is the problem when you give the knowledge and you feel something is wrong, it means they are not ready to receive. And the energy we get back doesn't mean *I don't trust you*. It just means that at the moment they cannot digest the information.

021450 K: when I received the message to teach, the first thing I learned in the process from the masters of the universe of teaching was not to force. Just make the teaching available. It is for them to accept and you cannot force it. I put it in very simple language and people do not understand. You cannot say *I will pay you to trust me*. *I pay you to love me*. I have to be able to test to understand if I can trust myself so that I can trust you with what you give me. Then if I don't I can't accept that you 'feed' it because it is emotion. You give it food, you feed it. You get upset if you offer me (physical) soup and I say, *no thank you I had lunch*. Then you get upset if you give me information from your soul and I say, *no thank you* because I already have enough on my plate. I cannot digest any more fields (of information). It's the same process.

021611 A: Recently there was news in the Chinese news that they sent a 2nd satellite to space. Then they were talking about technology, energy, food and I thought it was great. But what are they doing in space?

021646 K: at the moment we have to teach the man how to get themselves the ethos of the space before they become men of space. The people who join the KF Mozhan program are first taught the ethos of space before they are given the tools of space. We will see in their conduct and according to their conduct they will be taught the next step. We will be splitting the teachings according to the understanding of the soul of the technology and the physicality of the space ship. It is very much the way I teach the medical separate from the agriculture and the innovation center separate as well as different levels of understanding of different people who are inventing different things.

021741 K: the space technology must be done now. When I went to Iran I signed a contract with the Iranian government. I didn't just walk in and it took about 3 weeks to draw up this agreement. The cornerstone of this agreement that was signed and registered by the Iranian government in the structure of the country is that my technology would not be used in any way to harm anyone. But it can be used to defend a nation, a culture or a being without harming. And the Iranian government has kept to that ethos even though they

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

apply different technologies to it and add other bits to it. Part of the structure of our signing is that both sides deny anything that the other would say, that this way we keep our work going. And the Iranians have kept to that ethos. I thank any government that has a structure and is in power and has still kept two pages of documents word for word in British and Farsi. I even have the registration of the contract.

021903 K: the beauty of it is that we agreed with the government of President Ahmadinejad that KF would never be promoted in Iran, becoming centralized and then only Iranian. They have kept their word. There are lots of Iranians who do work and follow the KF work and we agreed and were made to understand in a different way at the time, but we understand more now that we will not establish any work of the KF except what is agreed by the government. In the future if the Iranian government changes its position regarding our agreement we have agreed if they want to open it. But that is a decision to be made by the present government and the office of the Ayatollah Khomeini that the technology will be kept as they wanted even though they practice at different levels.

022014 Rick (R): there was a question before whether some of your teachings were translated into Persian. I didn't think there were.

022026 K: I have taught enough in Iran and some work has been translated and some of the books have been translated into Farsi. But I have a written agreement with the Iranian government that we work this way. I understood why the previous president was pushing for it at the time and now we understand more of it. But it is the freedom they can use it for peaceful application and they have done so. It's a very detailed written agreement and I respect the Iranian authorities for keeping to the ethos. The condition was that we never promote my work in Iran until the time they see they want to open it.

022112 R: what about study groups or someone who might want to do an Iranian or Persian workshop.

K: they are doing it. A lot of work is done in Iran.

R: there are a number of people who have asked if there are Persian language translations.

K: there is a group permitted in Austria or Germany to translate the books into Farsi and the response was that they did not see any problem so we announced it last year.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

022212 Keyvan: it was a man from Sweden.

K: they checked with the Iranians who lifted the translation restrictions on the work. There are a lot of Iranians outside of Iran who work and transfer knowledge to Iran. We have to respect what was agreed with the Iranians. It was pages and pages and I sat in a hotel for 3 weeks until the agreement was signed. It is a very detailed agreement between me personally and the Iranian government. When they want to release it, it has been registered in the agreement structure of the government. There are a lot of translations. And part of the agreement is that I do not promote my work in Iran.

022306 K: But a lot of Iranians through proxy servers have access and they do the work of the KF supporters and they make the Magrav units. We are informed of their work and it's not something that I agreed to eight years ago with the office of the President and the Ayatollah. It's the same as the nuclear technology. It is not strange. It was developed for years without anyone knowing about it. The same was done with the space ship program. We have seen the work of it; in the way we work and the way we agreed. I took the position as a nuclear physicist as an Iranian senior adviser and I understood we never let anyone know how we developed the nuclear technology of Iran so rapidly. It is not secrecy but respecting what we agreed to until the day the present regime or the new government decides to open up. We don't go trying to enforce anything because we have a signed agreement and they have respected it so we do the same.

022442 K: It's not hidden technology; it's the same as the nuclear avenue I understood the Iranian nuclear through all the negotiations. I stand firm with my government and I still carry an Iranian passport even though I have lived abroad for 42 years. I am proud to be from part of the earth that has established the ethos.

022523 Azar: if I understood when we talk about space, I want to give an analogy. If we have two men and one who understands the soul, the non-physicality and plasma and you have another man who just understands only the physicality and has to go to space in a suit and armor. If you go to a garden (which is space) and there is a door, and both men have the door opened.....

K: let me go to this directly. The man who wears the armor and the suit is stuck with propulsion.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

022606 A: when you opened the door the man with the armor and the suit doesn't see the garden but a dry land so he has to go his car and get his food and flowers and sit on the dry land and eat. But the other man looks at the garden and says that it is beautiful and has everything that he needs and he walks in there and everything is available to him. Now what the Chinese people are doing is putting on the armor suit and they go to space and they don't see anything.

022634 K: it's not that; we have to respect the Chinese scientists. This is very much; we have to respect every culture and what they do. This is part of the progress of understanding. The Chinese, American or Russian leadership all have facilities and contact with what you call extraterrestrials, or people of the universe. At that level they see but they cannot gain the knowledge because they have not committed themselves to peace. The minute any of the world leaders commits their nation and their culture into peace, you will see this become the land of knowledge.

022731 K: None of the world leaders have understood this yet. There is no use for us to teach them when the commitment of peace is not there. And they don't see it. All the problems...we have a multi-billion dollar agreement that can be signed at any time in respect to environmental cleanup in China and the leadership has blocked it from the fear that this will create a lot of unemployment. They don't see that it creates a lot of freedom for the people to serve the nation. We have multiple agreements sitting on the table waiting for the green light from President Xi. The people around the leadership have frightened the leadership that there will be so much unemployment. But they don't see that so much comes in and you have a contented nation when people receive everything they want and they would adore their leadership. They would 'worship' the leadership for the freedom they give them. This is what puzzles me with the Chinese leadership. This is why we stopped negotiations because they don't see that if they want to bring prosperity to the nation, prosperity doesn't come out of the pocket. You are always chasing the next food or clean air.

022902 K: you have all the problems in Beijing. If you allow people to participate and allow the government to open up what is there on the table, they have everything they need. They need to walk with a mask and have so many chemicals added to the water. And then they still have more problems because now they are just employing people to divert different things just to create job. The job comes out of the pleasure of the satisfaction of serving. And this is what the world leaders have not understood (2.29.35 minutes) and this is why we started teaching the masses.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

022941 K: **We support the KF China heavily and as I said, Armen and I as heads of the KF discussed this recently. The minute we delivered the completed generator and now it has gone to the wireless, we had no choice. The leading to making solid state generator has led us into wireless energy transfer. It was inevitable. So Armen and I discussed that in the next few days we give a copy to Armen in Los Angeles, a copy to Armen in Armenia KF, a unit blueprint to Benjamin in Africa and one each to Canada, Arizona, India, and Asia plus 2 KF China laboratories will receive the blueprint. And we will show all 10 generators simultaneously worldwide. We have made the target as October 20th. The Vatican, the house of the pope, will be the first trigger showing from Ghana.**

023110 K: We will show it across the world and in live simultaneously in 10 to 20 nations. You will all see it. Why? Because of the knowledge, the fear is coming from the leadership of the countries. The knowledge of the peaceful action is coming from the people who will teach the governments. People will force the governments to become peaceful governments. We tried to work with the governments; the bribery and the pleasure of the physicality of women that most of the leaders have is their pitfall. You don't want to know what I know about them and how I lived among them without their knowing how we observed their behavior.

023150 K: this is the problem. The Chinese have never realized and this is my biggest problem with President Xi at the moment, that the move to space technology and the understanding of technology is an asset to the nation. They will find the space will open for the whole nation and all the Chinese language-speaking people across the world. They will shine like a diamond. Now the Africans are doing this. Why? Why create fear? The space technology in China is speaking because they have to, but they are going the path of the propulsion from 30 to 40 years ago. There is a lot of doubt whether man has ever been to the moon. This belt and that belt (Van Allen belt in space) have not been passed and going to the moon is all lies? It's very easy; you can now have a lift and go up and look around.

023248 K: you see Mr. Armstrong's footsteps on the moon? He's there, we see it. I was talking to someone very strange who no one knows but he opens another door of creating doubts. But, in fact it brings a lot of joy. I sit for 7 days in a little capsule in a chair, and I send you up thousands of millions of kilometers away. It is very strange—you walk out and you can walk out like a perfect man. Test what the astronauts did in the capsule for 7 days at home and see if you can stand up and walk as though you were not sitting for 7 days and you will be a free man. There is a question mark. There is a huge question mark in the operation of the reality. But it is not for us; they 'achieved' landing on the moon. Soon in the coming weeks and months we as

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

humans will show the footprints if there are any. If you have a doubt you can show it, but then people will say *no you put the footprints there just to say they were there.*

023419 K: We listen to both sides, but the space technology now has no doubts. They talk about the life behind the moon; there is another structure on Mars. Of course there are. What do you think? You see the systems here and they don't exist? They exist across the universe. There is life on the moon if you look at it, but you are so blind that you do not see it. You don't see the life because you eat from the atmosphere from what falls on you and you are bottom feeder (of the atmosphere). How do you want to see life on the moon that is much lighter in gravitational field? Are they more intelligent? Probably, because they don't kill and because of that they receive knowledge from the universe much easier.

023519 K: there is a lot of wisdom we have to understand. The Chinese and American space programs are correct because we have to add to our knowledge. You don't suddenly become an astronaut tomorrow and Mozhans the day after. We have to gather knowledge and test different environments. The Chinese are in that process. You have to understand what the problem is. When a world leader commits himself and his nation to something in a given time and he doesn't get it, or he knows he can't get it, then he has to fake it. Otherwise he won't be there. By the end of this decade America would land on the moon—by hook or by crook they had to land.

023624 K: it is the same with the Chinese and don't forget the Indians are in space technology too. The Iranians are in space technology and we are aware of the tests and the development on the Iranian rockets, which were rumored to be the rockets that would be used to hit America. What about the rockets that were launched by the Israelis to put up satellites? These are 'free' but when the Iranians do something it becomes a 'world threat.' This is carrying the media—it is terrorism by the media. How come when the Chinese and Iranians do something it becomes the 'missile to attack' the 52nd state of the United States called Israel?

023713 K: **we have to understand that mass media control through the Jewish Lobby is very, very strong. We don't know all the truth because they don't let us know all the truth. But the grip will become less and less, because the mass media has become Internet and they have no control over it.** The Chinese are in space and we congratulate them. They have to do it. They want to achieve different ways to produce water; it is their right and we support them. We are still there standing next to the Chinese government. It is the path of work that has to change in respect to the foundation.

023800 K: Do not imprison KF supporters or people who are aligned with us who are accused of this and that. There are a couple of scientists who were in communication in the past 2 weeks and we are told they are in prison. We asked for clarification and we are still waiting. We saw the magic parallel in the past seven days in the LA airport. It was criminality through the commercialized police force.

023830 K: The Chinese have to go to space, the same as the Iranians have to go to space. But they need people strong enough, like people in the KF to be able to withstand the forces outside through the technology. One of the reasons Iran has withstood the 5 + 1 is that we did not give a thing; we went according to our ethos. We did not give a single cent or gram of material the way it was requested by Israelis through 5 + 1. We stood and we have more powerful technology like the plasma technology that makes the things obsolete that they are negotiating for.

023907 K: I explained this; the Chinese have to go through this process to learn and then stand through the strength of their technology. We support them and we will not abandon the Chinese community or the Chinese leadership regarding the technology of the KF. It is for them to understand it and threatening us by their proxies or the proxy of their military, who see their positions in danger, doesn't help. It was the biggest mistake by the Chinese military to threaten KF supporters and imprison them.

023947 K: you know me; I always release what I say I am going to release. It was the biggest mistake the Chinese military made to imprison KF supporters. By the approval of the leadership or not, there should have been more control over their army by people who pretend to be part of the military structure. We do not stand threats. We simply dismantle the communication with threats that are made.

024054 K: do we have the guys from London who tested the Magrav system on line?

R: if they are a viewer they need to put their hand up and I'll promote them to panelist.

024119 K: there are 5 of them there. The people from Magrav UK if you are on the line, come on and add to our knowledge.

024146 R: we have a question from Cleve in the live stream. In a way it is a trick question in a way.

K: you answer it; you answer trick questions well.

024210 R: the idea is that Cleve is interested in getting the advantage on the ordering for the wireless receives and wants to know what gauge wire.

024240 K: If its wireless you don't need wire, so why do you need to know the gauge of the wire? I think we answered very cleverly between the two of us. If it is wireless it doesn't have wire, so why does he need the gauge? Maybe that will enlighten you.

024401 R: Don Graham (D): no audio

024436 Chad (C): **Mr. Keshe I want to thank you for the technology and I am new to this. I have been using Himalayan GANS water on the arthritis in my legs and it's working out just beautifully and I wanted to thank you.**

024503 K: you are welcome; this is the knowledge that comes from across the KF.

C: it's just amazing and it relieves pain and it loosens my knees.

K: are you mobile?

024519 C: the arthritis was not a severe case, I was still walking, but I was hobbling, taking little steps and it allows me to take full steps again.

K: what is your condition? How deep is it?

C: it's a stiffness and an achiness in my knees.

K: both of them?

C: more so in the right leg, than the left leg.

K: is there a problem in the hip; has it moved up or is it just localized in the two knees?

C: it is just localized in the knees. A bit in the ankle, also.

024619 K: one way to speed up the process when you get this condition is that you attract too much calcium towards the joints. What this means is that in a way is that the skin and the femur in your lower leg is not creating the right vibration for the calcium to go through the bone

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

structure. The field of the calcium is absorbed from the lymph but it's 'too big' in the calcium state to go through the lymph and in a way it splits off towards the joint. One of the things you can do now that you are relieved of the pain, try to walk on your heel to toe. It is very important. When you are standing up, and I taught this a couple of years ago, try to tap your heel and put it down first and then go to the toe. On the next step do the other heel the same way.

024733 K: you have to change the vibration of the internal structure of the bone so that it takes the calcium into the bone and becomes part of your bone marrow. The calcium that you get is the calcium that is transferred the lymph to the bone but is not in the strength or size to be able to penetrate the bone to become part of your bone marrow. It literally slips up and gathers in the joint area and then creates what we call arthritis. If you have reduced your pain, you haven't sorted out the problem fully. You have to sort the problem; now you have more freedom to walk. You have to help yourself and re-tune the bones. So when you walk, try to put your heel like 'tap dancing' with the heel instead of the toes. This sends a vibration into the bones and they re-adjust their frequency of the vibration of the bone structure to not to produce the bigger size plasma, but the size that is needed.

024903 K: Once you go through the process, whatever is calcium or affects the calcium fields on your joints will be dissolved in the body gradually and you get rid of it. Now you don't produce the extra ones to be the producer of problems in the future problems. When you get arthritis like this, it is re-tuning the bone structure that is needed. I have done this before and maybe you will understand this easier if I draw this for you. **Your bone structure is like a guitar string.** **2.49.56 minutes. The vibration which these produce creates the plasmatic gravitational field which attracts the lymph into the bone.** If one of these is out of tune, it's like a piano and now a different size is created. When it comes to the bones it cannot be slip slap to the centers. In the drawing the ends of the joint or knee are being shown at 2.50.20 minutes.

025022 K: so, in relieving the pain, you have not solved the problem because these 'guitar strings' (bone structures) are still out of tune. So you know when the piano tuner comes and tunes the piano by adjusting the strings, the vibration from the bone creates to adjust these. The older we get the more things get clogged up. In a way when you tap you are shrugging off any parts that are clogged. They are working then and they absorb the right plasma to become the calcium into the bone marrow. So now that you are rid of the pain you can walk, but you haven't solved the problem.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

025109K: Try to tap with your heels and walk from heel to toe and make it a 'solid' step not a 'soft' step. You will find out in this process that you create much stronger amino acid for what you call your immune system. Your health gets better and you go back to what it was like when you were 20 or 30 years old. You have to follow the process fully and you guarantee yourself a total reduction and you will find out it's like when you were young that you don't catch a lot of colds or diseases. It is that now you have re-tuned it. The older we get the less walking we do and the less walking we do, we change the tunes, the guitar strings of the bones and one thing leads to another.

025202 K: This is why athletes stay healthy, because they run. That is why one of the best examples of this is the boxers because they always jump and they always fall back on their heels to defend themselves. That falling back creates a lot of clearance in the muscle. They jump on their toes when they practice. The moving backwards on their heels is what gives them their strength. You see this with high jumpers. Look at the high jumpers and the long jumpers they always go back on their heels. If you and I were to jump that distance, we would most probably break our bones. In going back and forth they strengthen these 'guitar strings' of the bone and it creates a more solid bone and a better structure for the immune system. It's all connected to each other.

025310 K: you will find out when you look at all the D cells, all the C cells and all the T cells which are the main structure of the amino acids of the body of the man, they all have a common denominator of calcium as the cornerstone of their structure. When you don't absorb the right calcium to become part of your bone marrow structure you lose some of the strength of it. Because you are lower in strength with your immune system you become more vulnerable to colds, and other diseases. This is important for people past the age of 45 or 50, even if you can't do anything when you can strengthen the lower, but when you are walking heel to toe you literally clean up any dirt between the 'guitar strings' of the bones.

025405 C: so it is better to do more walking then?

025412 K: yes, but when you put your heel down, especially when you begin this, tap your heel and then go forward to the toe. When you walk from the back to the front you are 'tapping.' If you want to clean the rugs, you shake them to get the dust out. You do the same between the strings in your bone. When you tap you create a vibration in your bones that literally get rid of anything that is clogged up. In piano tuning terms that has tuned a C note to a D note. Now you have a C only because your body needs it the most. Now you get rid of the "D" note because you change the tune.

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

025459 K: You only do this by walking heel to toe. You have to put the heel down with a force and you create a shake. You find out you become very healthy. But don't this so hard that you damage the knee and the ankle. Do you understand? Just do it enough, and when you are doing nothing, instead of tapping your toe like a musician try tapping your heels. You will help your own health. This is part of the structure you need to do. I am in my 60s and I tend not to walk much, but when I am aware of this I walk the hill because it allows to clean up the system. You increase your immune system and that strong immune system prevents cancer in the body. Walking in man's life is the cornerstone of his health because most of your bone marrow creates most of your immune system in your femur.

C: thank you!

K: I hope you recover.

C: thank you, thank you.

025634 R: I ended up injuring my right knee 4 days ago...

K: was it from kicking or did you get kicked?

R: I fell off the deck and twisted my knee.

K: just put some CO2 on it and you will have no pain.

025706 R: Yeah that's OK but, in a way I need to feel the pain so I know what is going on with it. I also have been taking the CO2 GANS water and baths. In a way it's like hurting my knee hardly happened. I was on the way to landing on my head and I was 'saved' by the leg.

K: the soul said, *take the knee this time, not the head.*

R: it's time for me to slow down a little bit.

025815 Flint (F): this is Flint.

K: from the United States? Thank you for all your hard work.

025829 F: in extension to the question on the knee what is advisable if there is no cartilage and it's so painful to walk that I can't walk. What is a good remedy?

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

025846 K: **you can rebuild the cartilage; it's very easy. Building cartilage with the plasma technology is as easy as drinking water.** I have done this many times. But the only thing is you produce nano micro layers at a time. When you do it, you have to take the pressure off it for 2 to 4 weeks. Try not to walk to rub against what you have produced in the nano micro layers. One of the best ways to do it is to get what is known as knee transfer braces where you take the pressure off your knee and you allow the cartilage and everything to be reproduced.

025934 K: It's a simple thing. You have your bone and it's a simple plastic system where they use solid plastic above the knee and below the knee and there is a strap that you strap across the plastic. What happens is there is a joint in the center made of solid plastic. You transfer the weight of the body through these joints attached to the solid plastic pieces. You give your body a rest and the joint the freedom. You see a lot of sports people wear these. You need it and what you need to do is to produce GANS of CO₂ and GANS of copper oxide (CuO). You need to understand the ratio. And you need another material that cartilage is made of which is partially calcium based. You need calcium oxide in there. You need zinc oxide (ZnO) because cartilage carries a fair amount of emotion. You need a fair amount of CH₃.

030043 K: You put it on the knee and take the pressure off it. You take the system from the time you walk off the bed until you go back into bed and make sure there is no weight on it. You allow the cartilage to be made. In fact, you make cartilage every day. Even when you don't have this cartilage issue you make cartilage every day. Everything that is made is dropped off. You speed up the process while giving it a chance to build up. After 2 or 3 months there is enough cartilage made and it is soft enough and getting hard enough. 6 months is preferable and you should have no problem with the knee because you enhanced the production of the knee cartilage and then the body will carry on. All you need to do is to take the pressure off it and create the environment to make much more rapid production of the cartilage material. If you have ligament damage with the knee you need to add magnesium into the GANS mixture. Ligaments and tendons are different than cartilage and they have a magnesium mixture in them. You need a fair amount of magnesium and the lack of it is why the cartilage is a very shiny color and not the red because it has a certain amount of copper in it as well as the magnesium.

030329 R: would having a bath with Epsom salts, which is magnesium sulfate, would that help?

0301236 K: Long term you need the mixture there constantly. You have to realize that I learned this from an old chiropractor who explained to Caroline and me, 21 years ago, *the body is like a house and when you put the wrong foundation everything else built on top goes wrong.* You

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

have to fix your toes, your ankle, your knee, and your hip and then the rest look after themselves. When you have a problem you have to go through all the processes of full recovery, not just for a few minutes. You have to allow the base (the foundation) to become solid and then the whole life of the man depends actually on your toes, then your ankles and then your knees.

030333 K: when you have a problem with the knee and you try to sort out a little bit of it, the whole body has to move, the knee has to adjust, the hip has to adjust, for that little change. Then the whole body has to adjust for that change in the knee and then the whole structure moves and then you get more problems in the future. When you have a problem with the knee or the ankle make sure you go through the full process and not just temporary just to get rid of the pain. You have to develop and allow what is damaged to be repaired fully. This is what most people have no comprehension of. I was teaching this to one of our KF teams recently.

030418 K: a lot of you women, and men, but especially women wear these open sandals and you knock your big toe, little toe, or one of the other toes. So you clip it. If you get the full pain of it, in 5 to 10 years time you start the back pain and the problems with the discs. I explained this every so often because we have new people with us who have to understand it. They can protect themselves very easily.

030514 K: Your foot is like this and I'm not a very good drawer. 3.05.18 minutes. You have the big toe and the other toes. Your body is made of two balance systems. You have the balance for your emotional part and you have a balance for your physical part. Your emotional part balance sits in your ears. Your physical part balance sits at the bottom of your foot and there is a narrow ridge from one end of the foot to the other on the bottom. And the shape of your foot, when you look at the foot of a woman, you have the whole story of what you need to know about the woman. Caroline tells me if you look at peoples' feet you know everything.

030558 K: the shape of the toe, the direction, the thickness and the sharpness of the toes, everything tells you about the soul of the man because it is the toe that dictates the foot and that is how the rest will be shaped. So what you have, you have a shape, when you clip (bump) this baby toe, you move the physical balance. This middle ridge is like a neuro vein and it might just move a micron amount because of hitting the toe. When this ridge moves, without you knowing all the toes have to move. Now this is your foot and this is your ankle, your knee and the rest of the body. Now this nerve going up the leg has moved a micron. The structure has

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

moved and all had to move to adjust to the movement from bumping the little toe. Now the ankle has to move too because the muscles have taken a slightly different position.

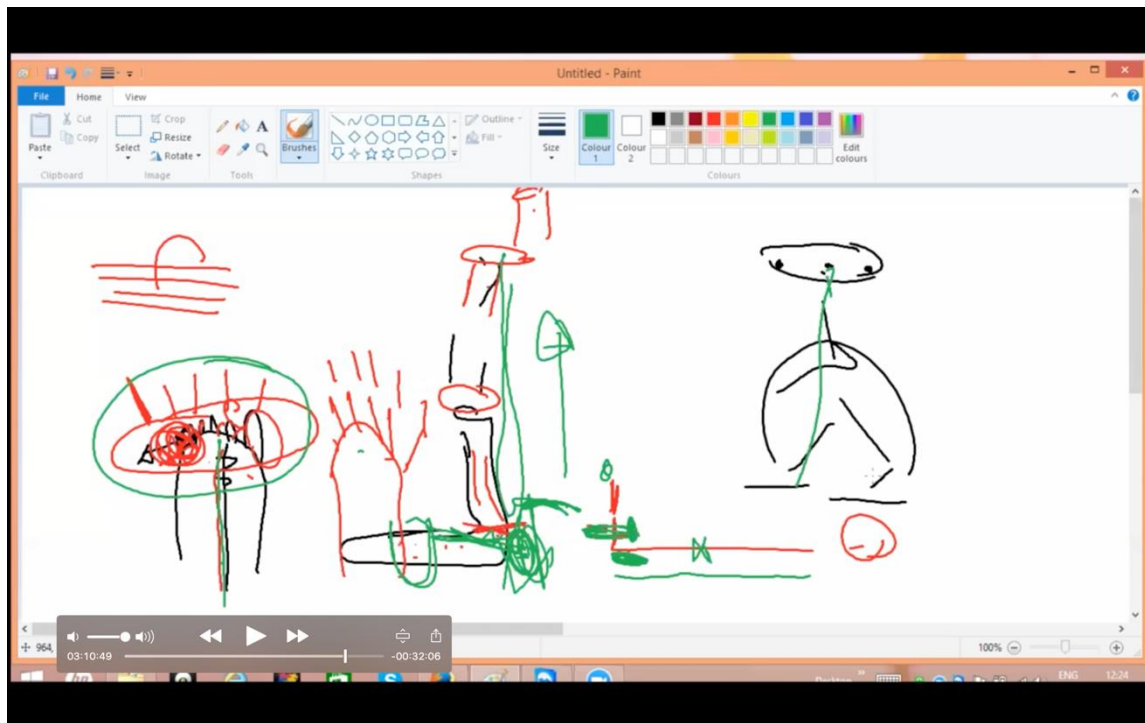

030714 K: You will find out that maybe you twist your ankle. But that is because this toe was bumped or maybe the big toe was bumped in your fancy shoes when you hit it on the leg of the chair. Now the twisted ankle has moved and all the muscles up the leg have to move so the knee moves to make the adjustment for this movement. Now the hip makes an adjustment and it goes up the spinal cord and you get a pain in your neck. Osteopaths and chiropractors never fix the toes. Fixing these means no pain in the ankle, the knee, the hip and the back so you don't need to go to the chiropractor.

030752 K: so you have to fix the toe. It is very easy and you need somebody who loves you and has strong hands. You lie flat with your toes pointing up. You start from the smallest toe on one of the two feet and you hold the toe across the back of it with the index finger and the 2nd finger and you put your thumb on the front of the toe, facing the face. And you pull the toe directly and vertically up towards you. And you hear a click. You continue on to the next toes until you have done them all.

Then you come back to the small toe and you do the same inside the toes. When you have done that, you are bringing back the center of the foot 'vein' in line. But don't forget, it got used to where it was when it was out of position. So, you have to repeat this process 2 or 3 times the first 3 days and then once every day for a week or so and it goes back into position.

030917 K: but now that you pulled the toe up you sorted out the toes and you have come up to the ankle. The ankle has already moved so now you put one hand on the back of the ankle and one hand holding the foot. You rock the knee a few times to loosen the muscle and then hold firm and pull the whole thing towards you with a huge powerful force like you are trying to pull the leg off the body. Then what you see is that everything lines up. Lie on the bed for 5 minutes or so and don't get up right away. Lie there and let it adjust. Do this 2 or 3 times. Your sciatic pain goes, your back, hip and spinal pain goes and if you repeat that once a month afterwards you continuously readjust yourself.

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

031028 K: Chiropractors and Osteopaths never touch this. I have taught them but they never use it. Once they fix this there is no more pain, you don't go back and you are no longer a customer. It's very simple when you understand the physiology of the body. When you walk you always have this connected to this (3.10.49 minutes—the head connected to the feet) in a very funny way. The emotion through the soul through the leg balance works in a very effective way. The way you have the lung for your emotional side which is the air side of the atmosphere and the physical side has to adjust. The balance between the two comes through these two systems and the emotion has chosen the middle ear to balance the emotional side. If it is not balanced, you go dizzy. If you are not balanced physically then you twist your ankle and you have pain. So, when the two are in balance you are okay.

031136 K: If you get dizziness and lose your balance then understand that there are four points that are connected to each other. When you have a cartilage problem with the knee you have to understand that somewhere in the past you damaged your toe. You have to fix this while you are wearing the braces on the knee. You have to understand that everything has a process of action and reaction and you have to look at the total and not just locally. Once you wear the brace on your knee to allow the re-growth of the cartilage, if you take it off and you still have the problem with your toe and your ankle, the knee problem will come back again and you'll say the process

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

for the cartilage doesn't work. You have to do this the toes while you are wearing the brace to grow the cartilage and the ligaments.

031237 F: thank you, that explains a lot.

031247 K: do they have a twisted ankle or sciatic pain? They have damaged the toe.

F: this is my parents.

031300 K: they have done this in the past and it takes 5 to 10 years to show this and it's a very slow process. The chiropractors don't like me to teach this because they lose customers. The other thing is the same with your teeth and we repeat this continually. Just try with your children even with your dog and cat to feed them a small amount of cheese, 5 or 10 grams, every night before they go to sleep. Before you go to bed make it a habit of life to eat cheese. You will never have to see a dentist unless you have an injury and you break something. You even strength the roots of the teeth with the transfer of the energy. The cheese, especially the hard cheese releases chemicals in the mouth that stops the deterioration of the enamel, or tooth decay. Even if you have a hole in your tooth, it will repair itself. The enzymes to kill the new cells the tooth is making are not there. The tooth repairs the hole with the new cells. 3.14.19 minutes. It is very important to take just by accident eating some cheese is an important part of creating balanced enzymes in your body so those materials that stop the growth of the cells.

031448 K: we have the wrong image and I was explaining this to scientists in the past few days. It is good to explain it again. We have the totally wrong image of our teeth and the operation of our teeth. Our teeth grow continuously. You don't 'lose' it because it is continuously replacing itself, the way you make skin. You create layers of teeth. When you stop the production of things that can damage the teeth then they are able to repair themselves. You find when children have a hole in their tooth, and then you give them the cheese just before bedtime every day you will find the cavity will not be there because the repair is constant.

031543 K: There is something that is never fundamentally understood by the man. The teeth are the root to your life. They are the conversion point between the physicality and the man's physical life. You chew the matter and in chewing our teeth sense everything in the structure what they need to have to support themselves when they become part of the digestion. Our teeth are our radar and they are the sensors between the physical life and our emotional life. This is what is important for us to realize and this is absolutely paramount.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

031635 K: Teeth are not just there for chewing; they are the receivers of information and in route it transmits the emotion of what we eat into the physical body. This is important. And then you will find out what and how we chew is important. How we transfer the matter of the knowledge from chewing to the matter into the stomach is important. We never understood this and we just looked at the teeth as a part of something that we use. They are the biggest receiver/transmitter of information between the matter state and the GANS state. You can transmit anything and everything with your teeth.

031732 K: The people who breathe through their mouths have different behaviors that people who breathe through their noses because now the information regarding the matter state is transferred through the teeth and not the senses of the nose. You see this from behavior and you understand different cultures. The way you breathe through the mouth is the way we control the absorption of the matter in our lungs. You will find that people who feed themselves by breathing have the understanding of how the matter state will change when it is absorbed.

031820 K: If you breathe through your mouth and change the rate of the breathing through your mouth, you decide what food and what energy is absorbed through your lungs and you don't need to feed yourselves. I explained this as the trick of the Indian guru who came to us in Descanzano 2 years ago. If you breathe through your nose you absorb and digest in a different way the energy from the air. When you breathe through your mouth and the air touches your teeth you change the conformation and transformation of energy. The air from the mouth is considered as part of the food. The air through the nose is considered part of the recycling of the energy and your emotion.

031913 K: And the way you eat food and the taste of the food decides what enzymes are needed in your stomach to digest the food. When you breathe and it touches your teeth and tongue, now the digestion system moves from the stomach to the lung. This has never been understood by the world of science. That is why we can move you from eating food into breathing and then from breathing into absorption of the energy without eating, drinking or breathing. Your teeth in breathing behave in respect to your lungs what is to be absorbed as food and the energy from its environment.

Transcript from 138th Knowledge Seekers Workshop held September 22, 2016

(v4 2017-09-16) DRAFT (Transcription has not been verified. Double check info with video)

032004 K: teeth are one of the most important parts of the life of the man. That is why when we get older and lose our teeth we lead a different life. Because we lose the teeth and we rely totally on the stomach and digestion for the information. Part of the information does not arrive because the antennae are lost. When you look at the shape of the tooth of a man or of the child you can tell a lot about his psychology and behavior. The closeness of the teeth, the space between the teeth, the whiteness of the teeth explains a lot. When you look at the body of a man and you understand it the way I do you just pretend not to because they like it that way but you know everything about them.

032102 K: you look at the toe and ankle of the woman and man, their feet, the fingers, the teeth, the position of the eyes, you can tell everything about them. And the teeth are very important when you get older. I have lost one tooth in my life and the rest are all mine. But when I was little my mother said I would be very thick from eating so much cheese. Unknowingly I ate half a kilo of sugar every couple of days, but I ate a half a kilo of cheese at night or during the day. Coincidentally that saved me from losing teeth from the sugar. At my age I carry more or less all my teeth. The dentists won't tell you this because there is nobody in the dental chair and no dentist.

032212 K: If the dentists were correct and taught them, people would go to them when they need them. This is what I need. I come with a sack of sugar. Or I will clean your garden or make a chair for you? These are little tips lost in the history of man and if you follow it and understand the reason behind it now we give you the food we have to teach you that have to look after your physicality in the matter state.

032319 K: please make sure those of you going to Ghana complete the process and those of you who want to present papers in Rome in December make your reservations and say what you want to present. Go to the reservation on Rome Reservation. We are processing the applications for those who want to go to Ghana for security reasons. If you want to join the doctors, please fill in the forms. We close the application for Ghana in the next week or so. There are 50-plus people who applied to be part of the Mozhan program. Please complete the process by next week or two regarding the fees and the full submission so we can advise you where to attend the training.

032434 R: many have questions about contacting people in their areas that are part of a KF group so they have someone to discuss things with.

032452 K: they are getting KF communities being set up and there are KF teams set up in different languages and we try to add to it and see what can be done. There are literally KFs in every country in the world. You have to look for them on the internet in your own language.

032539 R: regarding workshops, I understand there will be a new thing happening to get people together for workshops.

032554 K: Farhad and Vince and Kevin Blundell are working on this and have made videos. I hope we can announce this in the next week. I was just told in two weeks' time you will have the first USA workshop and just look in your language on KF. You will find them.

032624 K: I have to inform you that if you go to KFscam.com, this is by Mr. Kumran (?) who was part of a study group. We were informed that he was brought in by Red Circle in operation of the KF. Initially he pretended to be a child and we knew he was a pedophile because you couldn't find him. We couldn't get his exact address. In the arresting of Sterling Allen and the opening of his Facebook we saw that they were open with each other because they exchanged children. It was revealed in that section his work office and we informed the officers of the company he worked with. They checked his computer and he was sacked and we are waiting for his arrest for the same reasons as Allen Sterling and the others. And he set up KFscam.com and you see all of his fingerprints everywhere.

032748 K: when you go to the 'truth about KF', 'facts about KF' these are all the pedophiles paid to be there and they lost their leader. The guy who was giving them their free children is now in prison. So they have done these websites. We saw Allen go down. Now we see a published email from Mr. Kumran (?) that he got sacked and they found all the pictures of children on the computer in his office. The company had a subsidiary in the United States and they didn't want to get involved in this kind of thing, so they were transferring sick children to the states and they saw how sick children were given to the abusers.

032840 K: So when you see keshescam.com and look at Mr. Kumran (?). He was sacked and they found huge number of photos of children on the office computer. He was using his work time for other things with Mr. Sterling Allen. The same with the man who put up 'facts about KF' website is part of the same ring. Now we can ask Mr. Kumran if he has a job; he doesn't have one and he is waiting to be arrested.

032917 K: So when you go to your countries look where people put information. They even opened a KF website in Farsi trying to put things on and the Iranian government handled them very nicely. We don't have opposition. We have people who are paid to create opposition and they lost their links for getting children to abuse. Now they are the scam. The same thing goes for links and not everyone is supporters; they are paid to destroy all sorts of things.

032958 K: Find the correct people in your community. I congratulate the KF Turkey, which was just established and started working a few days ago. The Norwegians started teaching yesterday and we see others teaching each other. We share the knowledge freely and you share it the same way. Do not force information, just give people the gift of the knowledge and the gift of a patch for pain. They will follow and teach the others...it is the 'disease' of love and being able to serve. When you have a person with pain, it doesn't matter what they deny, what the technology is, when they don't suffer they see the truth. Their next step is to start teaching the others.

035051 K: KF, if you can't find one, set it up and you will find that others will join you and you become part of the other KFs. We support you in setting up. There is a huge structure of KF and more and more are being set up all the time. We had some 65 people at the working level of KF offices and management. We found out that more or less 30 of them now were people who were abusing the Foundation and the trust of the foundation so they have been released of donating their time to the foundation. We are now with a core of about 36 people who are highly efficient. The rest we rely on the support of the people who operate around the KF for their work.

033147 K: if you are a manufacturer or submitted a manufacturing application, we are considering them. The problem is that the majority of you want to manufacture for energy production and we are completing the solid state wireless transmission and we let you manufacturers wait until that is done. There is no use getting involved at this stage when the Magrav and hybrid units will be obsolete (when the wireless solid state units come out). It is our ethos to do the job correctly according to what needs to be done.

033229 K: regarding the other aspects of development we have set up industrial applications in Italy. If you are in agriculture or whatever, please contact the KF. There is much more to be done than the Magrav systems and energy systems. We are looking in the next few weeks, if you are a travel agent, for those who can come to an agreement with KF for promoting space travel.

We open the KF Space Agency to sell tickets in the next few weeks. We announced this several weeks ago and we have changes done so this cannot be hidden by governments. So, we are on target to achieve this by 2018.

033341 K: Please if you are in milk production, if you are in food production we have developed new technology for this. We are also developing technology for decontamination in hospitals and a lot of new technologies will be released. As of last week KF is in production and the materials on sale are bath oils, soaps, Himalayan salt for cancer. We now have permits with the C Certification and you can purchase these products from an arm of the KF. In Italy in the next two weeks you can purchase plasma drinking water that is being marketed in the stores. We can export this out of Italy with the License C approval. We have received this approval and now the labels are being produced. These are the things that are growing rapidly. We are developing more aspects. We have the development and sale of auxiliary facilities like toys, which will come online in the next few months.

033533 K: those of you who want to teach KF information as the workshop, by Monday you can go to KF and order the coils, the packaging and the Magrav pieces for you to use for your workshop teaching. We have received the pricing from Arizona and the pricing from Italy will be completed by tonight. You can buy all the parts if you want to make Magrav systems according to the KF standards. Each factory in each continent will supply that continent so we don't have to ship overseas or try to bring a product from Italy to pass the bureau of standards in America. Arizona will supply Canada, US and the whole of South America. Italy will supply the European continent and Ghana will supply Africa. We do the same in Asia with the Chinese. We are getting more distributional structure in place.

033643 K: we are ready to expand the foundation and bring in people we trust. I thank Kevin Blundell, Vince, Rick, Stanley and the security team for their hard work in the background to make these things possible. It has become a huge family in the KF and we need to understand and support each other's strengths and give a hand to others so that weaknesses become strengths. The facility of the KF in the next few months will become in a way as one family. You pay taxes only according to what you want to do. You can work in the factories of the KF and we give you everything free the same way you contribute and learn. Then you teach more. Come to the factories and learn how we make things. And then teach.

K: The workshops are like a factory for us because you learn and you teach and you create a position that satisfies your soul. You can create an income for yourself that will help you grow and bring peace into the family. We see a lot of people around the KF who work full time and the balance of the work is to come to share and in sharing they receive more. Thank you and I hope by next week we can share knowledge and show the wireless generator on October 20th in Ghana and at the Vatican. We are organizing this to be shown at the house of his holiness, the pope.

033857 K: And we will see what comes next. We will show at the same time in LA and Armenia, and if you are workers and contract with our work, we do not mind sharing with the nations. We have to do certain checks to be secure knowing that we will not have interruptions. The KF Russia is asked to contact the KF webmaster so that we can give you blueprint for the wireless generator system so that you can present it in Moscow at the same time we are presenting. We are looking at the same time for the KF India to contact us so we can give you the blueprint to produce the same as we do so we celebrate the release of the wireless generator together.

033956 K: We selected a time and a date that we agreed upon. If this is for a function that is set up in the Vatican we can alter the date to be sooner or later. And, it is important that with what we say *ENERGY IN EXCHANGE FOR PEACE* that we force what we call governments to come to peace as the governments are the biggest problem with energy we see as the KF for humanity. This is the target. We try to limit it to what we know is being done in the background. We will show the energy units simultaneously in KF Japan. The Japanese need it more so they don't bring more nuclear reactors into commission just because they need energy.

034108 K: Thank you very much; we call it a day. You have to understand the private teachings with the doctors, agriculture and others still carries on. It is not just the Thursday morning workshops. I try to attend some of the private teaching classes as we get time. In the past 24 hours I have taught nearly 15 hours. The teaching doesn't stop and there is a lot happening in the background. Now we need to structure the depth. Teach each other and take pleasure in sharing the knowledge freely because you will be given more knowledge. Thank you very much.

034203 R: thank you Mr. Keshe for the good session for sharing a lot of knowledge with people.

034216 K: you are reducing my wages each week!

R: you can't get much lower than zero, can you? You get to break even each week.

034228 K: thanks very much.

Rick: that is the end of the 138th Knowledge Seekers' workshop for September 22nd, 2016.
Thank you everybody for attending.
